# There is no SINGLE solution only pointers

#### Considerations

#### **Business**

Must be based on a viable business model

#### **Feasibility**

Must be realistic from a technical perspective

#### Responsibility

Must be a win-win and develop sustainable end-user relations

#### **Desirability**

App must deliver real user value

# We work for the end-user!

#### Potential for success when...

- it solves my problem
- it address my context
- it has a great look & feel
- it is easy to use
- it has the right functionality
- it performs great
- it inspires me in my task

...and it make me WANT to use it again

#### POINTERS IN MOBILE DESIGN

Who what where when and why

## The fat-finger problem

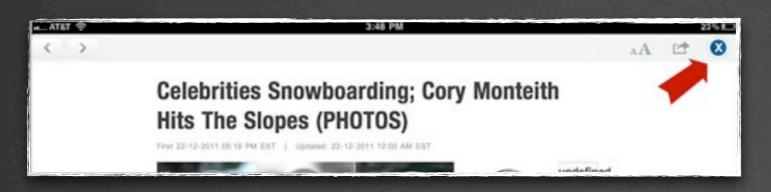

## The fat-finger problem

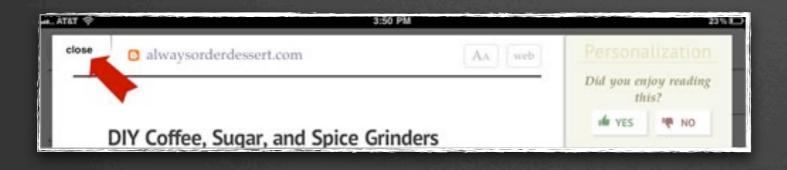

## Enrich standard navigation

## Huffington Post Web-relation and totally ugly

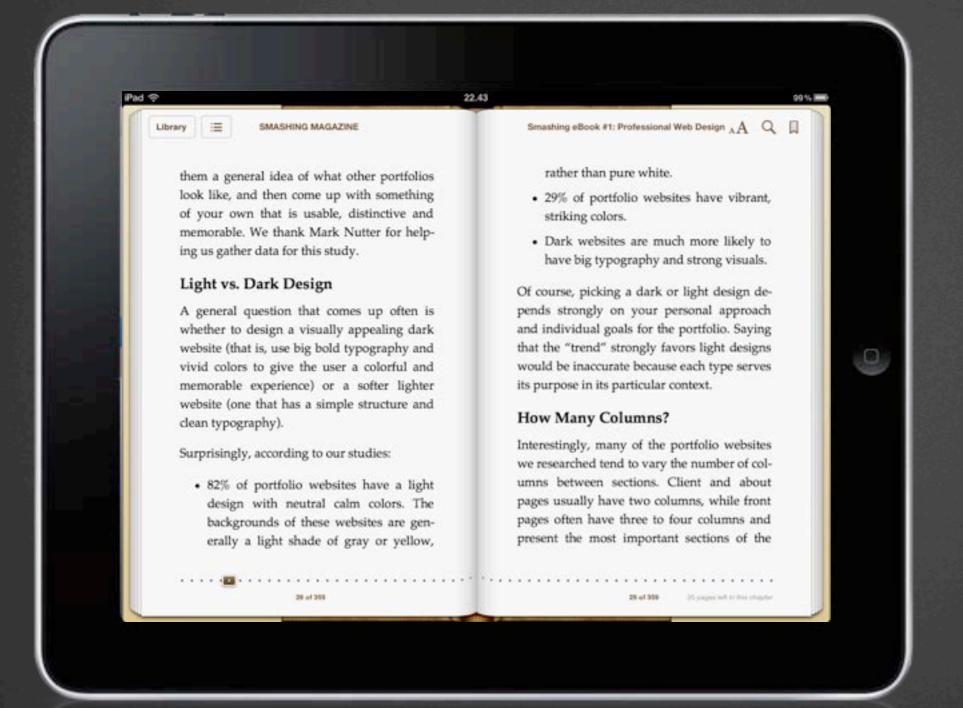

# New York Times Bad positioning Supplemented with pinch-gesture

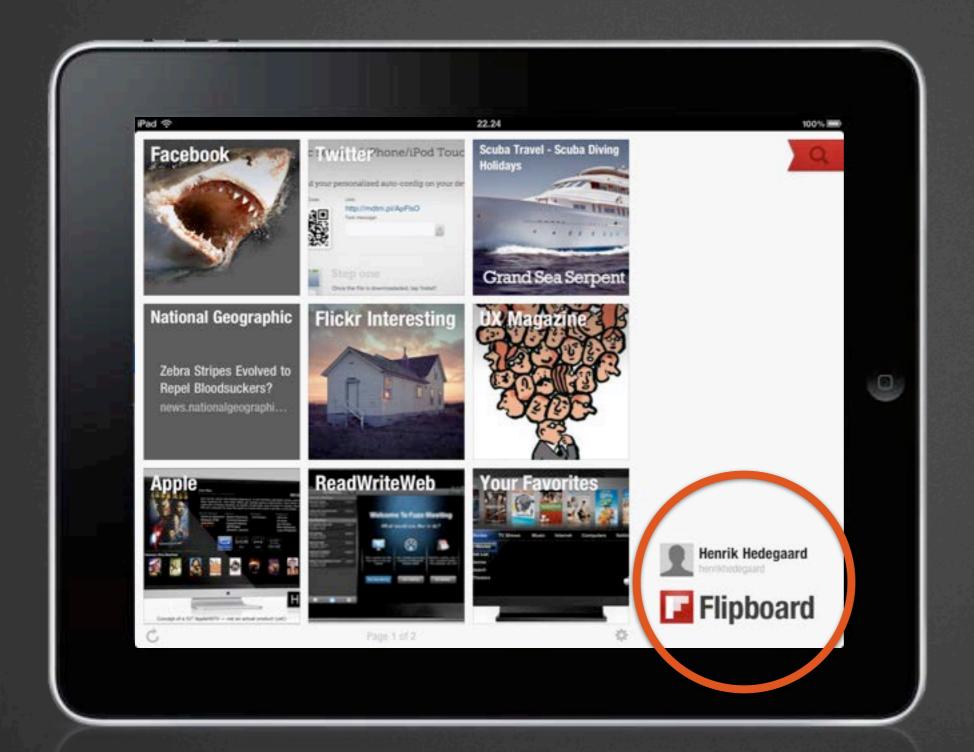

#### **Zite**

Very usable, but ugly Supplemented with tap-gesture

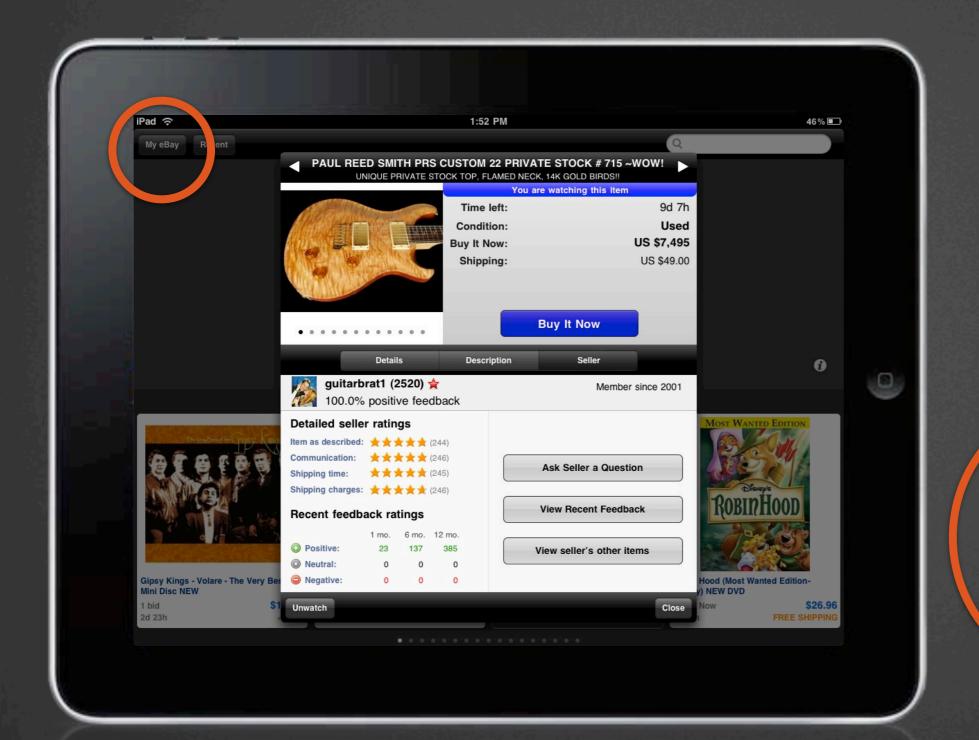

## Don't Gesturize the App

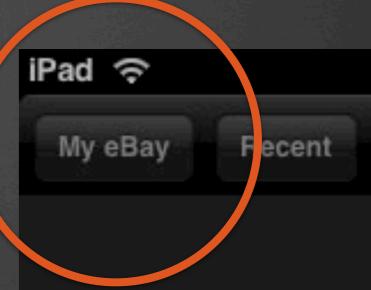

#### Consider Multi-User

## What's touchable??

#### Provide a "home" screen

#### **NASA App**

- One big mess
- No overview

But only if you have the right level of complexity

#### Provide a "home" screen

## Simplify complexity

- Goal: engaging self service apps
- Goal: reduce service calls
- Minimal amount of buttons
- Quick monitoring of usage
- Quick history functionality
- Quick statistical coloration
- Simple mobile code / login
- Well-know interface standard
