

The future of ASP.NET web tooling

Mads Kristensen
Sr. Program Manager
ASP.NET & Web Tools

We believe...

In Web Standards

We believe...

In Open Source Software

We believe...

In cross-platform development

We believe...

Your favorite tools are important

We believe...

It should all be easier

We very strongly believe...

In ASP.NET and C#

ASP.NET future

One ASP.NET

One UI layer, one dependency injection, one routing, one caching, etc.

100% open source

GitHub, accepting contributions, decoupled releases

Cross-platform

Mac, Unix, Apache, Mono

Cloud optimized

Smaller footprint, opt-in model, OWIN based, SxS

Tooling future

BYOT – Bring Your Own Tools

Grunt/Gulp, Bower, NPM are better with Visual Studio

New project system

Best of Website- and Web Application Projects + more

Automate everything

Command Line Interfaces, light weight

Web Essentials

Continues to be the main playground. You're invited

The Modern Web Stack

Data and Services

Web API, EF, SignalR, cloud services

Server-side

Web Pages, MVC, Razor

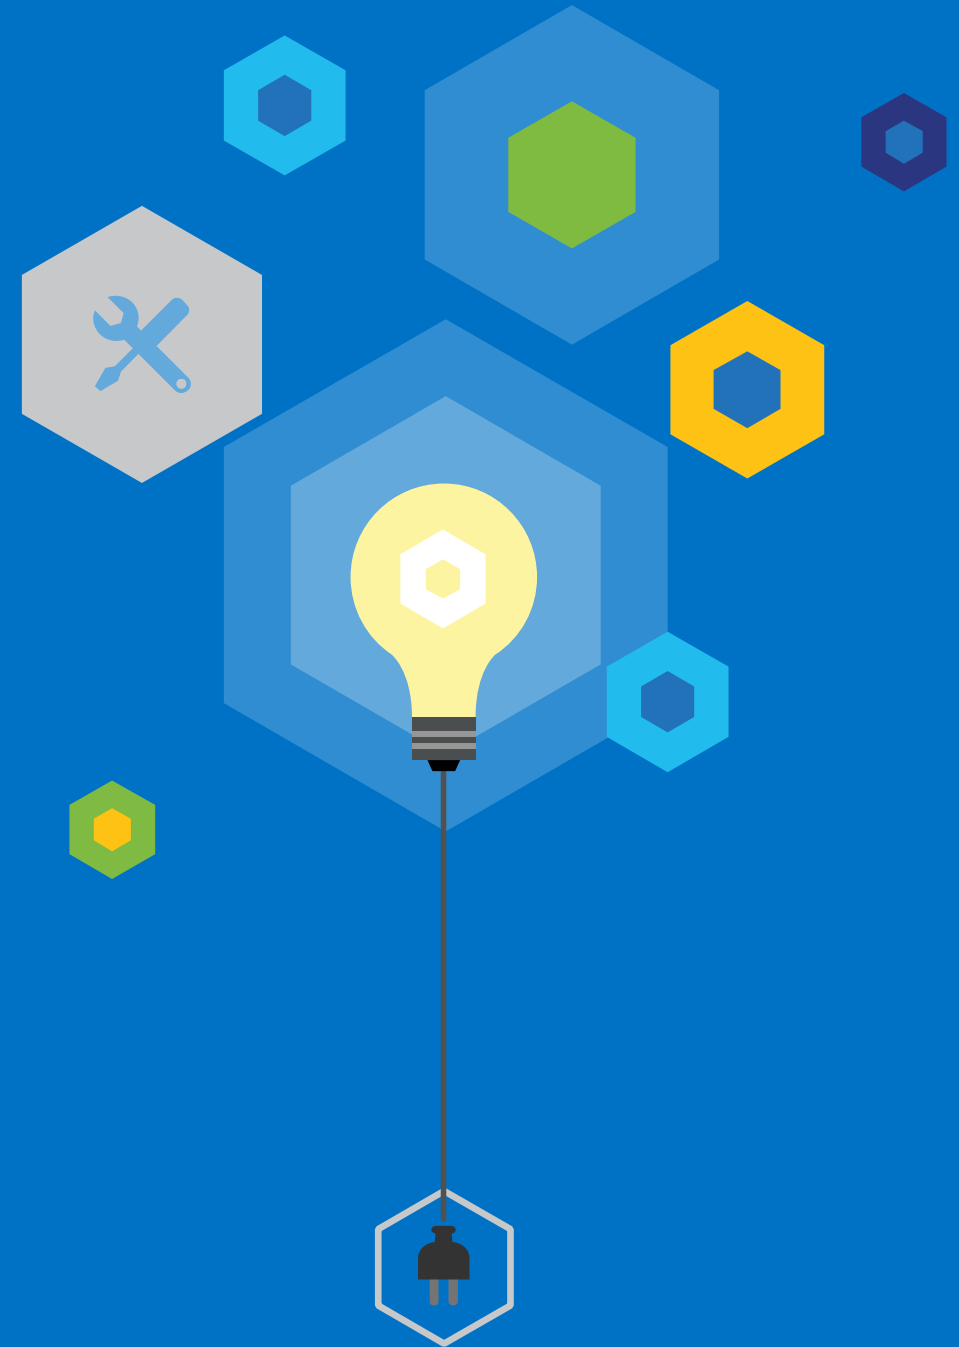

Client-side

Angular, Bootstrap

Backed by the cloud

For production, for testing, for development

Demo

Recap

100% open source

Cross-platform support

Cloud optimized

1st class tooling

You are in charge!

I hang out at
