

# Playing with Play!

Dmitry Buzdin

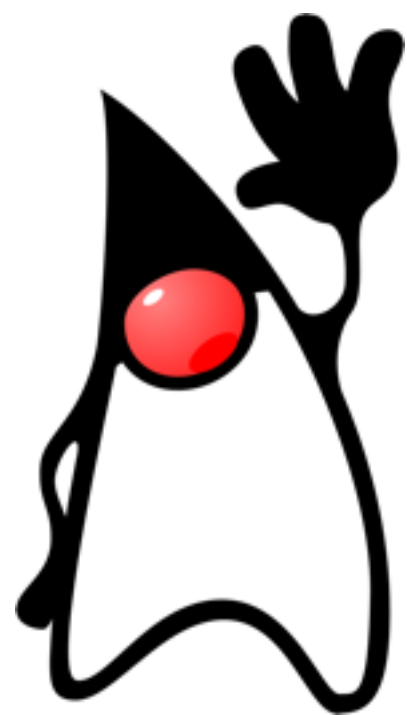

- Java + Web = ?
- Play!
- The Best Web Framework Announced

What is the most  
popular Web  
development language?

**PHP**

- Most of the Web uses PHP
- Java is for “enterprises”
- Enterprises are inefficient
- Is Java inefficient too?...

# Is Java Dead for Web?

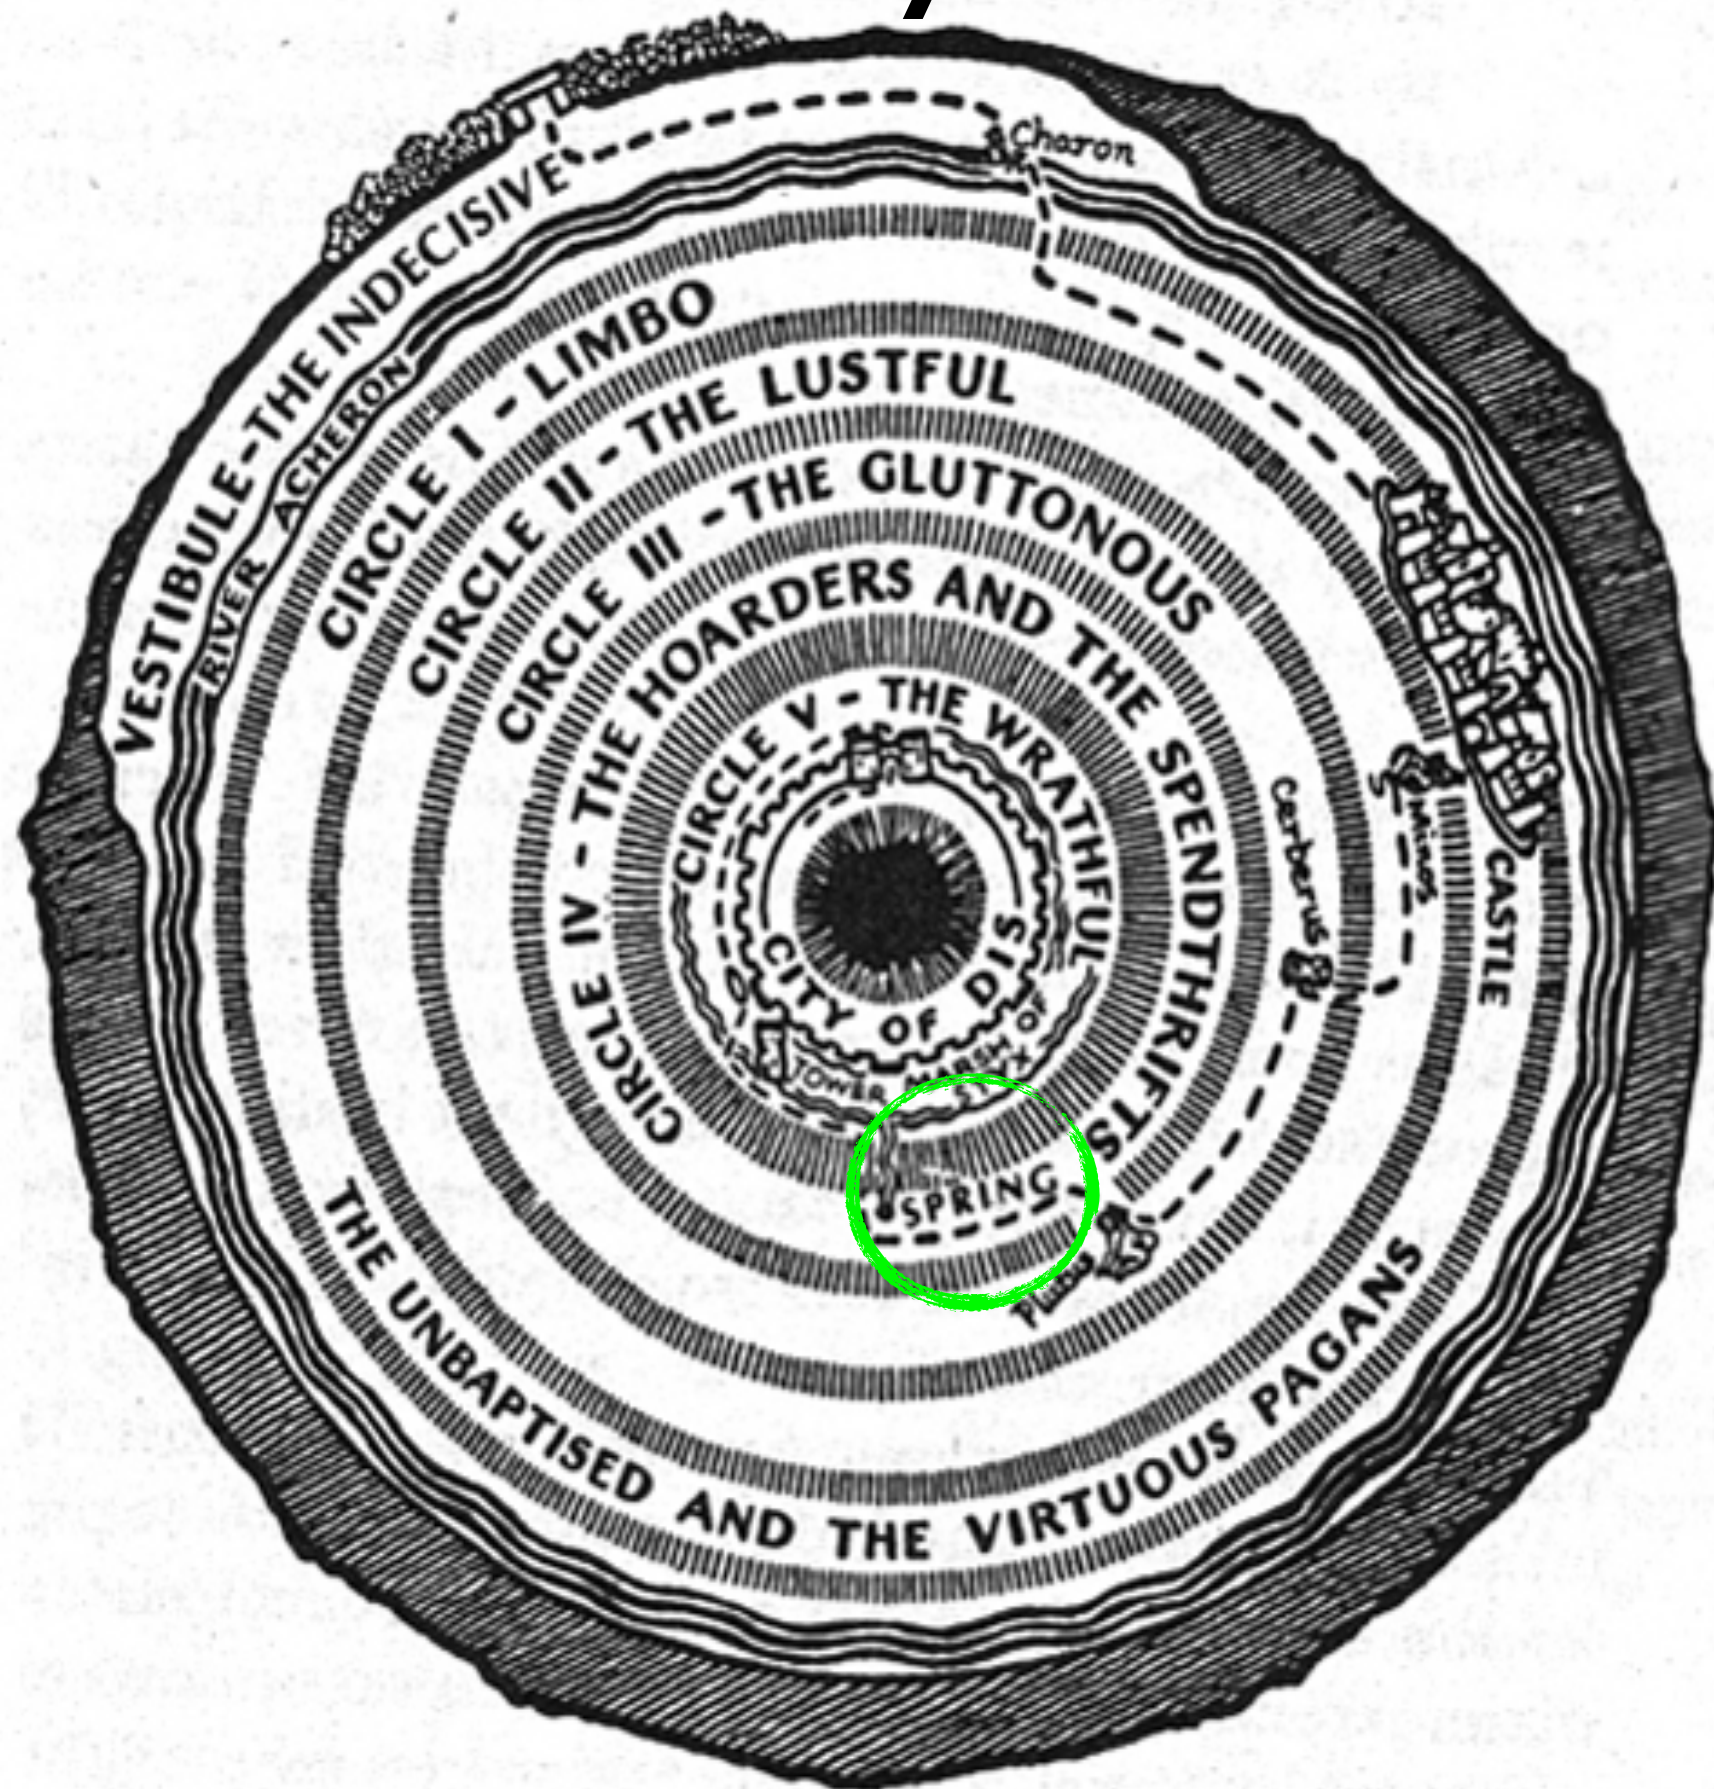

- Layered nightmare

~~UPPER HELL~~

# Layered Architecture

- Layered nightmare
- Jar hell

- Layered nightmare
- Jar hell
- Memory depletion

- Layered nightmare
- Jar hell
- Memory depletion
- Enterprise insanity

- Layered nightmare
- Jar hell
- Memory depletion
- Enterprise insanity
- XML madness

- Layered nightmare
- Jar hell
- Memory depletion
- Enterprise insanity
- XML madness
- No code without IDE

Would You pick Java for your  
next cool Web project?

Struts<sup>2</sup>

vaadin }>

apache  
**tapestry 5**  
*Code less, deliver more.*

APACHE WICKET

/// **Stripes**

- One-man team
- I have to deliver tomorrow
- Productivity is what matters...
- Leave Java for enterprises

# Hard Choice?

- Groovy

- Ruby

- Scala

- Python

- PHP

**django**

# What People Want?

- Full-stack solution
- Instant code refresh
- Coding by conventions
- Components and plugins
- Ajax
- REST

Seen anything like  
that in Java language?

Introducing

*Play!* 

DEMO

# What we have seen?

- Dead simple
- Productivity delivered
- Old idioms thrown away
- Builds on existing experience

**Play! is not a Toy!**

- Full-stack solution
- Instant code refresh
- Coding by conventions
- Components and plugins
- Ajax
- REST

# The Best?

- Play is a great framework, but not the best
- The best Java Web Framework is...

# The Best Web Framework

# What we have learned today?

- Java is suitable for doing Web
- Java evolves (slowly)

- Learn several Web frameworks
- Learn dynamic language
- Learn Play!
- Learn Java

# Wait, There's More

- Zenexity
- Typesafe
- Play 2.0
- Scala
- Heroku

# Thank You!
