Manhunt Over
Martine Gurule sleeps with the fishes. Or did, until the Department of Corrections hauled his bloated body out of a Texas creek Thursday afternoon. Gurule, the first death row inmate to escape since the Bonnie-and-Clyde era, was found in Harmon Creek, still clad in his prison-issue garb. Given the condition of the body and its proximity to Ellis Unit, which houses Texas' death row, officials concluded that Gurule drowned in the swiftly moving current shortly after escaping on Thanksgiving Day.

Useful Adobe Photoshop Techniques, Tutorials and Tools

By Vitaly Friedman | September 22nd, 2010 | Design | 14 Comments | Publishing Policy |

As web designers, we always have something new to learn. Over the last decade our workflow has changed dramatically — it's become more sophisticated and highly diversified. Not only do we have a much larger variety of improved tools to use; there's also an endless stream of new techniques emerging and spreading within the web design community via social networks. And this is where the opportunity to learn new useful, practical approaches and techniques comes in.

So I had to go pick up a new wireless router yesterday, and picked up a plain $35 Netgear one. Checking the back, I noticed this amazing, amazing panel, full of the most misleading garbage I've seen in a long time. Netgear should be ashamed of themselves. Let's just take a look at what's wrong with this panel.

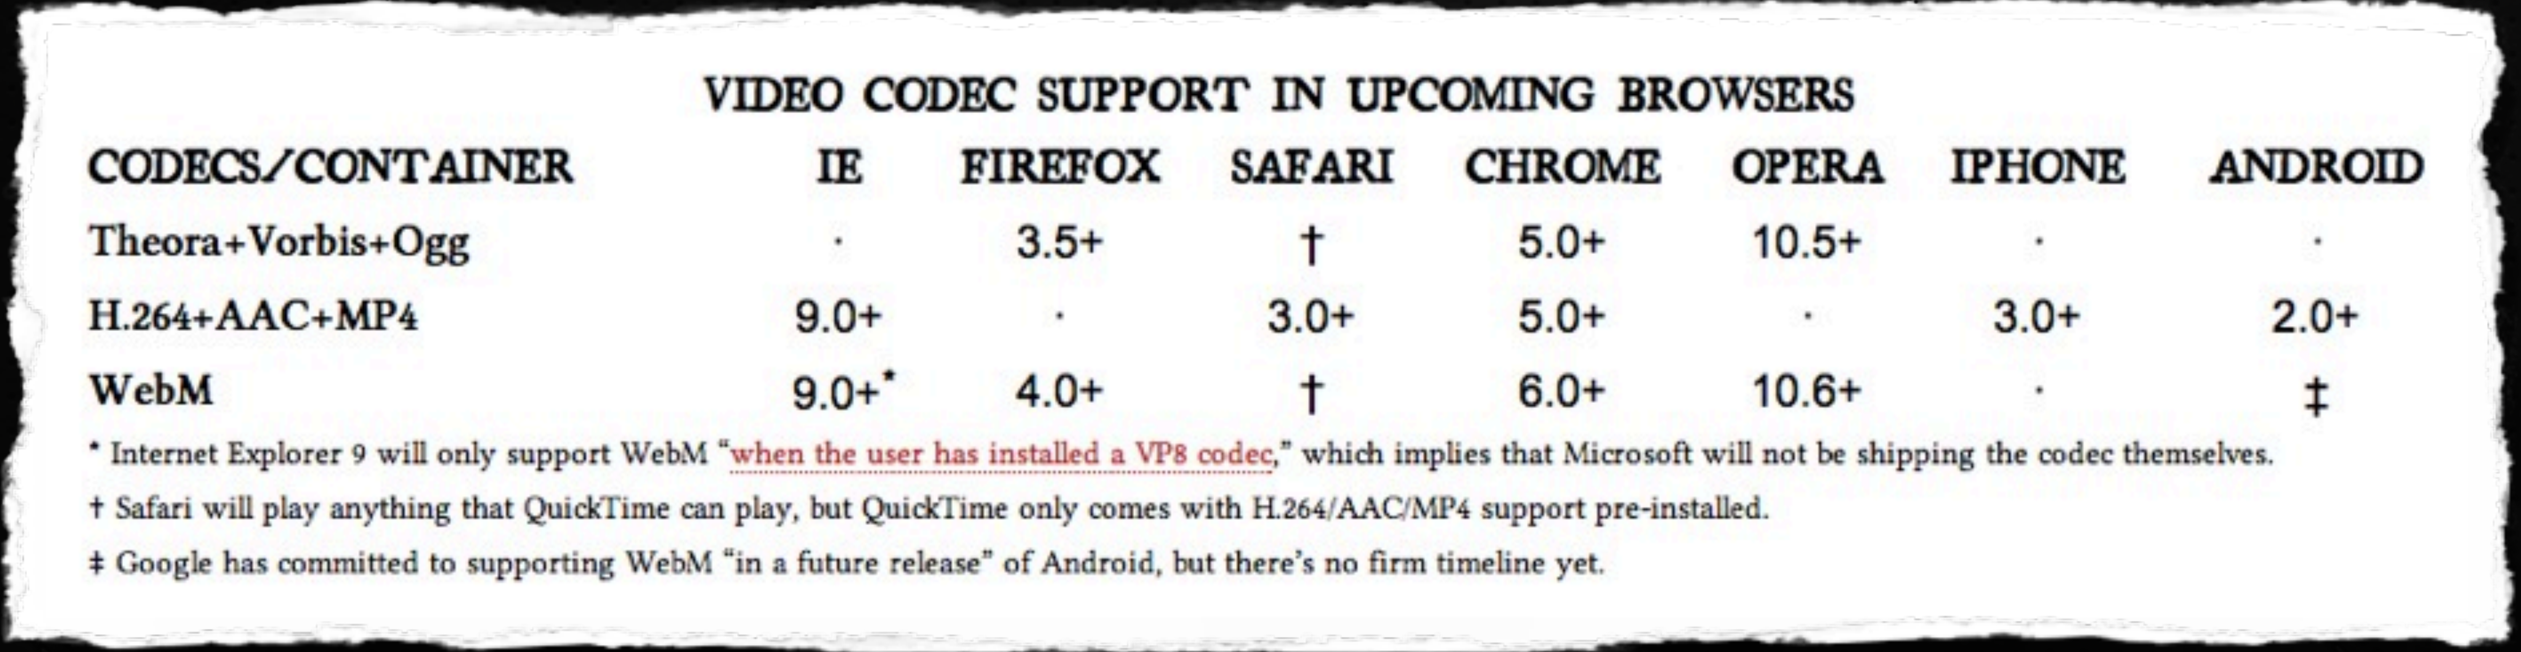
† Safari will play anything that QuickTime can play. QuickTime comes pre-installed with H.264/AAC/MP4 support. There are installable third-party plugins that add support for Theora and WebM, but each user needs to install these plugins before Safari will recognize those video formats.



VIDEO CODEC SUPPORT IN UPCOMING BROWSERS

* Internet Explorer 9 will only support WebM "when the user has installed a VP8 codec," which implies that Microsoft will not be shipping the codec themselves.

† Safari will play anything that QuickTime can play, but QuickTime only comes with H.264/AAC/MP4 support pre-installed.

‡ Google has committed to supporting WebM "in a future release" of Android, but there's no firm timeline yet.

Microsoft's Role in the Erosion of Online Privacy | Fast Company

Shared by **Fast Company**

fastcompany.com - The Wall Street Journal makes no bones about the matter: Its report, based on discussions with industry insiders, is headlined "Microsoft Quashed Effort to Boost Online Privacy." The core argument centers around the new version of MS's "industry leading" browser that hit PCs in 2008: Internet Explorer 8.0. According to several sources close to MS's management and coders, there was a huge move to differentiate IE8 from the other, increasingly competitive, browsers on the market by making it a champion of user privacy
