hinges. Listening at the door, you hear strange mutterings and the clatter of what could be pots and pans. Whatever is in there, there are several of them. Do you want to go through the door (turn to 159) or turn back (turn to 237)?

79

The passageway ends in front of you in a dead end. If you wish to search for secret passageways, turn to 137. If not, return to the crossroads at 267

80

The key fits the lock and opens the door. You find yourself in a large boathouse. Various boats, in different stages of construction, are lying around. Apart from the door behind you, there is another in the north wall. As you enter, the Skeletons stop their work and crane their bony necks around to look at you. They pick up planks of wood and hammers and advance towards you. There are five of them. Do you.

- Smile nervously and back out of the door into the passage? Turn to 129
- Tell them you've come about buying a boat? Turn to 123
- Tell them you're their new boss and order them back to work? Turn to 195
- Draw your sword and prepare for battle? Turn to 140

195-197

flies through the air directly at him, stops centimetres from his chest and falls to the floor. He looks up and smiles at you with an evil, gloating smile. What can you do:

- Draw your sword and advance? Turn to 142
- Try something else from your backpack? Turn to 105

195

This is a rather unlikely story, considering that they see very few humans around. Nevertheless, Skeletons are pretty dim - you knew this and that's why you tried the story. Roll one die. If you roll a 1 or 2, they don't believe you and keep on advancing. Turn to 140.

A 3 or 4 means that they aren't sure, and send two of their number off through the north door whilst the rest hold you at bay with their weapons. Turn to 164

A roll of 5 or 6 means they've believed you and they all get back to work! Turn to 9. Add 2 LUCK points

196

You search the room. Try as you may you cannot find the secret switch to open the door in the bookshelf - the old man must have locked it from the inside. You do find 5 Gold Pieces in a drawer in the table. You decide to return to the junction to the south. Turn to 280

197

At the top of the stairs the passage turns sharply to

## ETag header

Opaque “checksum” of resource state

When resource changes, entity tag changes

Strategies: hash, file attribute, GUID, version number, etc.

### Conditional GET

If-None-Match: <etag value>

“Return a full response only if the resource *has* changed”

304 Not Modified

### Conditional POST/PUT

If-Match: <etag value>

“Process this request only if the resource *hasn't* changed”

412 Precondition Failed

## Goods Ordered to Order Confirmed

Goods

*rb:cancellation*

## Design strategies

### **Polling**

Client guarantees delivery of notification

### **ETag**

Efficient re-querying

### **Cache but revalidate strategy**

Tradeoff between bandwidth usage and consistency

### **Protocol and media type composition**

3rd party resources and protocol

### **Idempotent POST**

Implement idempotency on server side

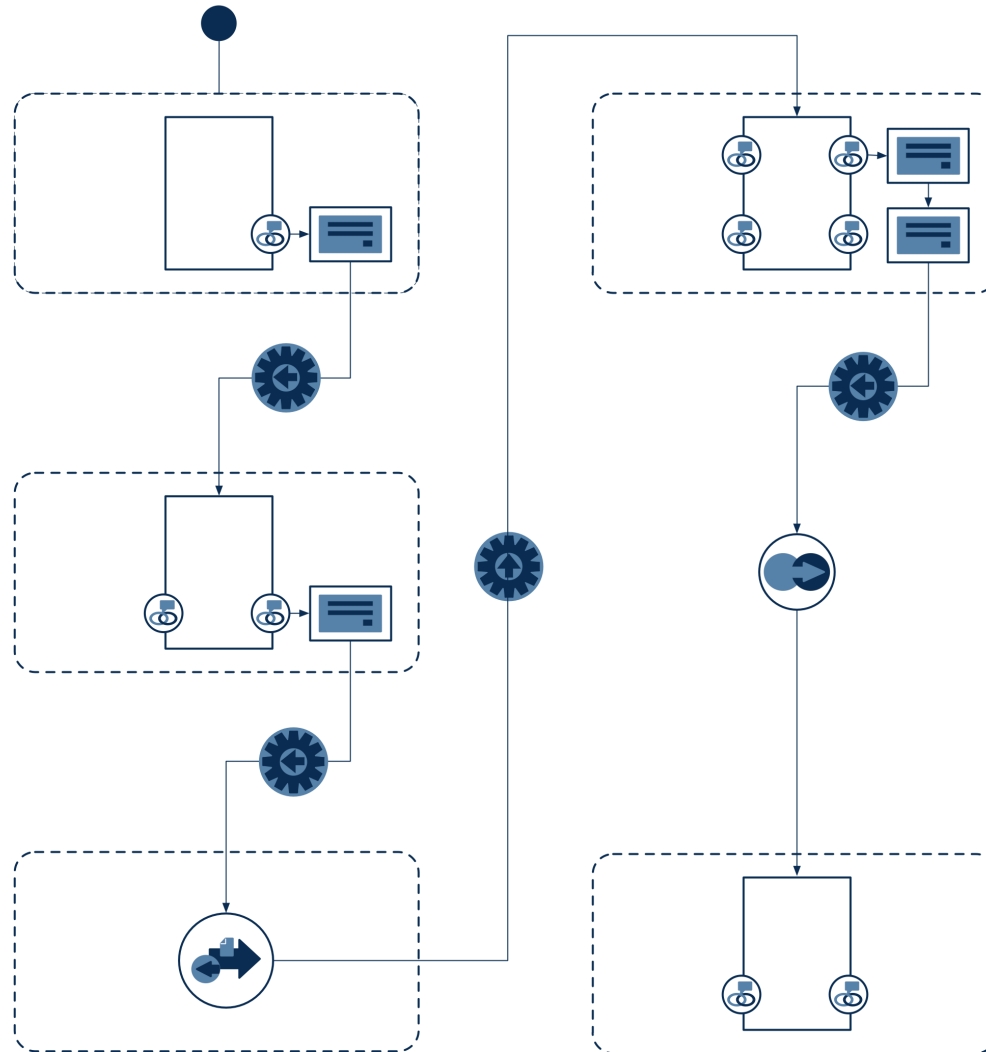

Client still expects POST to be non-idempotent

405 Method Not Allowed for subsequent POSTs

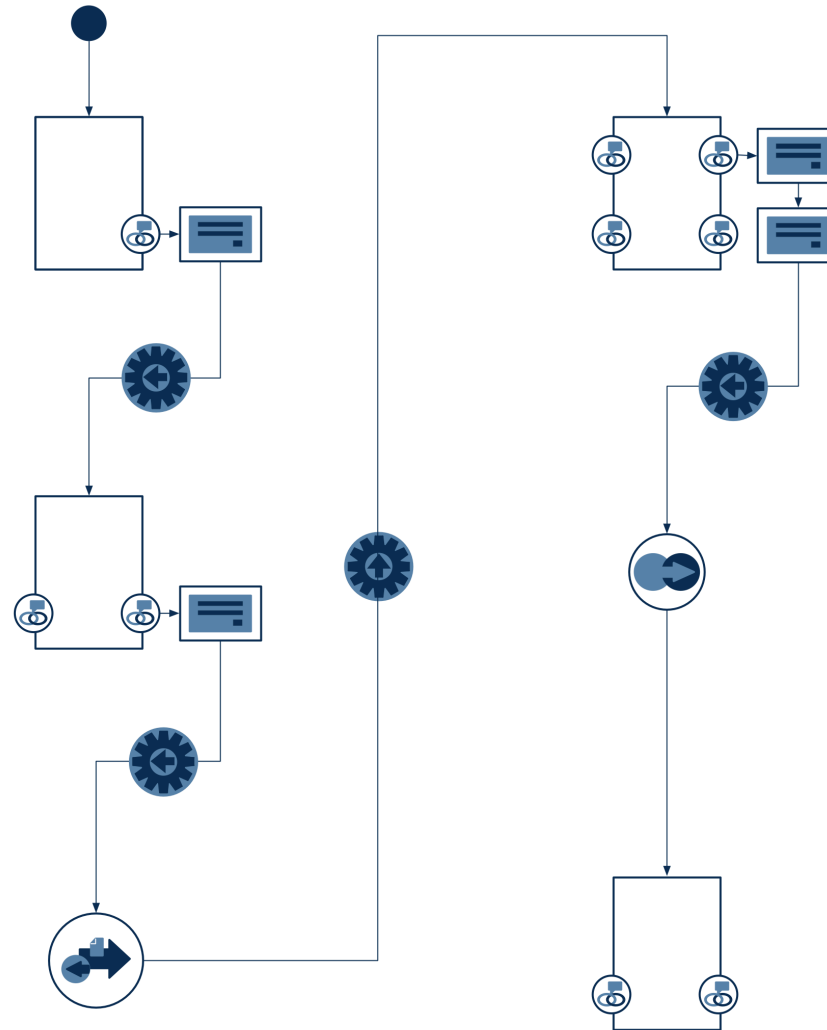

### **Resource state as a function of state of other resources**

Order state partly function of state of payment resource
