

Agenda

- **Background**
- Jazz, Team Concert and the Rational Jazz offerings
- A closer look at Jazz and Team Concert
- Using Jazz with the Rational Software Development Platform
- Using Jazz with other products - extensions and integrations
- Jazz in use today

Software delivery: A high-value area for business transformation

*“Only **34%** of software projects are deemed successful, costing over \$300B annually”*

*“Only **37%** are satisfied with the speed of software development”*

*“Only **42%** of users are satisfied with project quality”*

Geographic Barriers

- Language, culture, time
- Process gaps resulting in rework
- High degree of friction

Organizational Barriers

- Lack of domain expertise
- Poor LOB oversight
- Security of IP when outsourcing

Infrastructure Barriers

- Incompatible tools / repositories
- Unreliable access artifacts
- Lengthy on-boarding

Silos of People, Process, and Projects

An IT imperative: Innovate for less

Changing the cost structure of IT is a business imperative

Maintenance costs are rising...

Operational & maintenance costs continue to grow

Budgets are shrinking

Budgets are shrinking at a time when investment is needed in strategic business assets

Changing the Cost Structure of IT: A Business Imperative

*“The message for IT is clear; business needs and **expects greater agility from IT**. The current approaches to project prioritization, resourcing, agility and governance are clearly not satisfying customer needs.”*

– Gartner, October 14, 2008
“Changing the Cost Structure of IT Will Become a Business Imperative for Most CIOs”

The Jazz Project: Transforming software delivery

Jazz is a project and platform for *transforming how people work together* to deliver greater value and performance from their software investments.

jazz

- A major investment by IBM to create a **scalable, extensible, and collaborative application lifecycle management (C/ALM) platform**.
- IBM's vision of the **future of software delivery**—globally distributed, fluid and dynamic.
- An **evolution of the Rational portfolio**, which will evolve to support Jazz technology over time.
- A **community at Jazz.net** — where you can see Jazz-based products being built.

Jazz: Collaborative Software Delivery Platform

Collaborate

Deliver transparency of teams and projects for continuous, context-sensitive collaboration

Automate

Automate non-creative tasks with automated processes and workflows

Report

Deliver real-time insight into programs, projects and resource utilization.

Improve knowledge and practice maturity with an environment that develops individual and team talent.

Why collaborate?

Deliver transparency of teams and projects for continuous, context-sensitive collaboration

- ▶ Accelerate project and team onboarding
- ▶ Build team cohesion
- ▶ Leverage talent across and beyond the enterprise
- ▶ Enable flexible resourcing models

**Speed
time-to-
market**

Why automate?

Automate non-creative tasks with automated processes and workflows

- ▶ Make it easy to "do the right thing"
- ▶ Reduce tedious and time-consuming manual tasks
- ▶ Minimize non-productive wait times
- ▶ Minimize administrative busywork

Improve quality

Why report?

Deliver real-time insight into programs, projects and resource utilization.

- ▶ Identify and resolve problems earlier in the software lifecycle
- ▶ Get fact-based metrics -- not estimates -- to improve decision making
- ▶ Leverage metrics for continuous individual and team capability improvement

Reduce Cost

Agenda

- Using Jazz with the Rational Software Development Platform
- Using Jazz with other products - extensions and integrations
- Jazz in use today

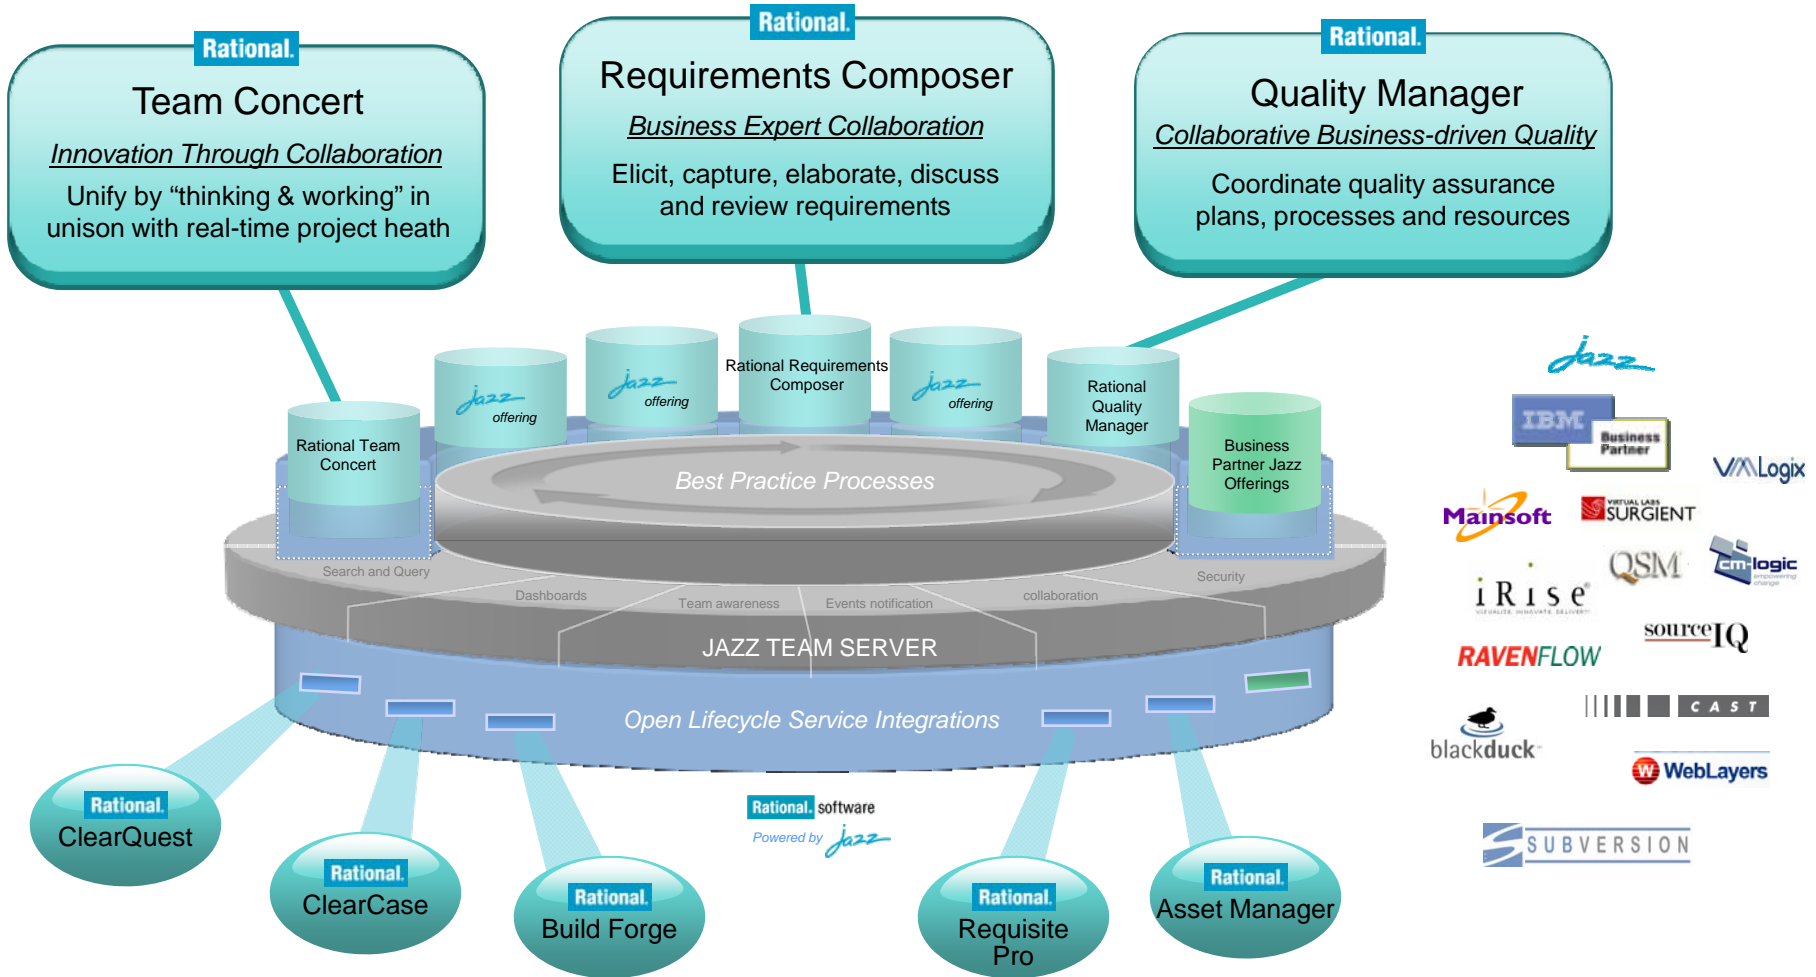

//jazz.net: Delivering greater openness and customer participation in the products they depend on for software delivery

- IBM has opened up the Rational Software Delivery Platform for greater ease of consumption, extensibility and integration to meet the unique usage needs of our customers
- IBM is providing transparent, collaborative customer participation in the development of new Rational technologies through an open commercial community

The first wave of Jazz offerings

IBM Rational Team Concert

Software innovation through collaboration

- **Real time, in-context team collaboration**
 - ▶ Make software development more automated, transparent and predictive
- **"Think and work in unison"**
 - ▶ Integrated planning, source control, work item, build management and project visibility
- **Deliver end-to-end governance**
 - ▶ Assess real-time project health
 - ▶ Capture data automatically and unobtrusively
 - ▶ Integrate document collaboration with enterprise infrastructure
- **Automate best practices**
 - ▶ Dynamic processes accelerate team workflow
 - ▶ Out-of-the-box choice of agile processes or customize
- **Unify software teams**
 - ▶ Broad array of clients: Web, Eclipse, Visual Studio
 - ▶ Extends the value of ClearQuest and ClearCase
 - ▶ Support for System i and System z

IBM Rational Team Concert

- Using Jazz with the Rational Software Development Platform
- Using Jazz with other products - extensions and integrations
- Jazz in use today

Rational Team Concert – a closer look

Iteration Planning

- Integrated iteration planning and execution
- Task estimation linked to key milestones
- Out of the box agile process templates

Project Transparency

- Customizable web based dashboards
- Real time metrics and reports
- Project milestone tracking and status

SCM

- Integrated stream management with flow relationships
- Component level baselines
- Server-based sandboxes
- Identifies component in streams and available baselines
- ClearCase connector

Work Items

- Defects, enhancements and conversations
- Query results view and share queries with team or member
- Support for approvals and discussions
- ClearQuest connector
- Query editor interface

Build

- Work item and change set traceability
- Local or remote build servers
- Supports ant and command line tools
- Integration with build forge
- Build definitions for team and private builds

Jazz Team Server

- Single structure for project related artifacts
- World-class team on-boarding / off-boarding including team membership, sub-teams and project inheritance
- Role-based operational control for flexible definition of process and capabilities
- Team advisor for defining / refining “rules” and enabling continuous improvement
- Process enactment and enforcement
- In-context collaboration shows team members and status of their work

Source code management

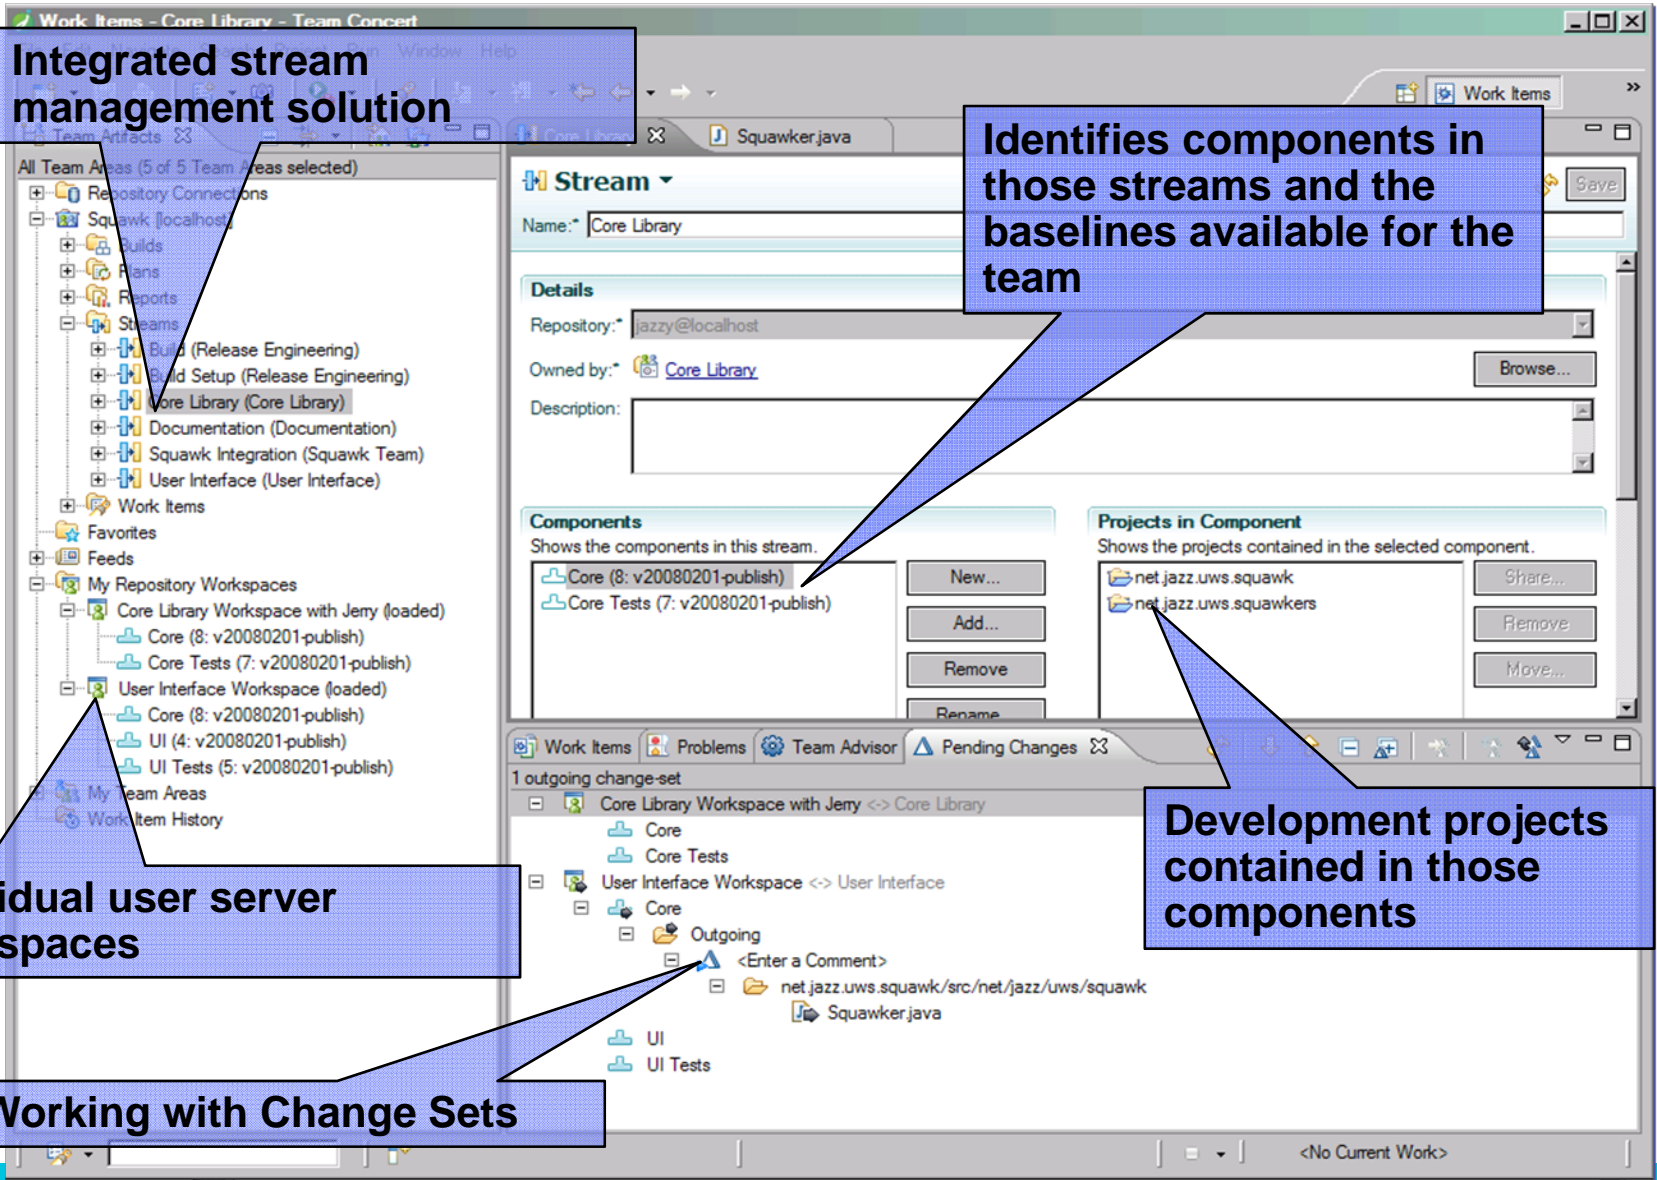

Integrated stream management solution

Identifies components in those streams and the baselines available for the team

Individual user server workspaces

Development projects contained in those components

Working with Change Sets

Work items

Predefined, custom and personal queries

Integrated discussion threads

Query results

Understands and persists work item's relationship to SCM and build artifacts

The screenshot displays the 'Work Items - UWS Temperature Conversion - Rational Team Concert' application. The main window shows the details for 'Defect 12' with the following information:

- Summary:** * UWS Add JavaDoc to CLI code
- Details:**
 - Type: Defect
 - Severity: Normal
 - Found In: Unassigned
 - Created: Jun 6, 2007 5:11 PM
 - Created By: Jerry Jazz
 - Team Area: UWS Temperature Conversion Team /
 - Filed Against: Core/Command Line
 - Tags:
 - Owned By: April Blues
 - Priority: Unassigned
 - Planned For: -> 1.0 M1
 - Estimate: 1 h
 - Time Spent:
 - Due: None
 - Resolved: Jan 24, 2008 4:30 PM
 - Resolved By: April Blues
- Description:** We need to add JavaDoc to our code. Note that I have sized this at one day and targeted it for M1. This means do it now while Zach gets the build going but only spend at most this much time on it, maybe less. We just need to get a start on it now.
- Discussion:** No comments
- Quick Information:**
 - Change Sets (2)
 - Included in Builds (3)

At the bottom, a table shows query results for 'Closed created by me':

I	Status	P	S	Summary	Owned By	Created By
12	Resolved			UWS Add JavaDoc to CLI code	April Blues	Jerry Jazz
10	Resolved			Expose functionality via public get method to core temperature ...	Unassigned	Jerry Jazz

Builds

Create build definitions for team and private builds

Supports Ant and command line build tools

Create local or remote build servers

Identify work items and change sets that went into the build

Historical view of the build queue with status

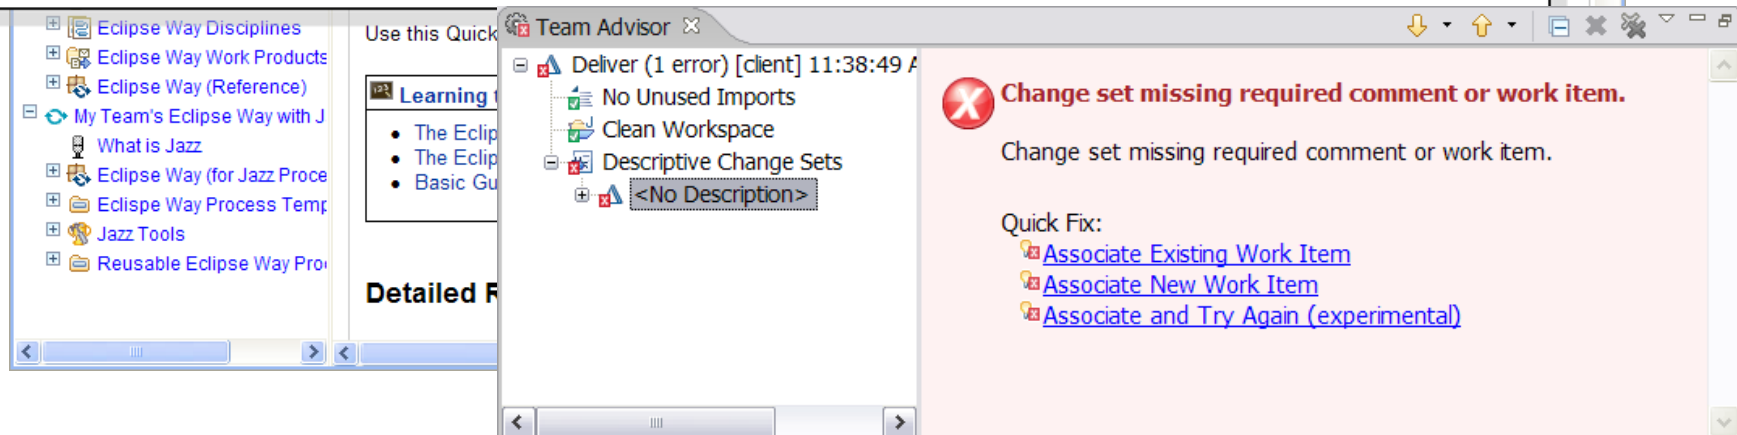

The screenshot displays the IBM Rational software interface for managing builds. On the left, a tree view shows 'Team Artifacts' and 'Builds' under 'Squawk [localhost]'. The main area shows a 'Build workshop.squawk.core.continuous.build' that is 'Completed'. Below this, a 'Contribution Summary' lists changes, logs, repository workspace, snapshot, and work items. To the right, 'General Information' includes requested by, build definition, engine, history, and tags. At the bottom, a 'Summary' tab shows a 'Historical view of the build queue with status' as a table of build records.

Build	Label	Progress	Estimated Completion	Start Time	Duration	Tags
workshop.squawk.core.c...	B20080310-2231...	Completed		March 10, 2008 10:30...	34 seconds

Enables process awareness and guidance

Team Advisor

- Rules can be run when delivering changes to enforce team or organizational standards
- Helps ensure higher quality results through enforcement of agreed-upon standards
- Rules are configurable
- “Quick Fixes” can be specified to simplify corrective action
- Process rules can be defined, refined “on the fly”, enabling continual improvements
- Out of the box including OpenUP, Scrum, The Eclipse Way, Agile (XP-like) etc...

Iteration Planning

Understand how well you are progressing against your targets in real-time

UWS Temperature Conversion M1 Plan [1.0 M1] x

UWS Temperature Conversion M1 Plan

Team Area: UWS Temperature Conversion Team | Iteration: 1.0 M1 (12/1/07 - 6/20/08) | 5 Closed | 9 Open

Owner	Task	Progress	Estimated	Time	Status	Count
April Blues	UWS Create the temperature conversion CLI package	1 / 17 -15 h	100%	2 days	Unassigned	9
Derek Holt	UWS Define permissions	0 / 8 -7 h	100%	4 hours	Unassigned	5
Jerry Jazz	UWS Define team members	0 / 4 -3 h	100%	4 hours	Unassigned	6
Zach Builder	UWS Create the core temperature conversion package	25 / 37 -10 h	100%	1 day	Unassigned	7

Dashboards

Transparency, collaboration and control via customizable dashboards

The dashboard is titled "Development" and features several key sections:

- General Navigation:** Includes tabs for "Builds", "Open Defects by Themes", "Open Defects by Team", "SVT Defects by Team", "Defect Trends by Team", and "Deferred Items by Team".
- Endgame Has Started:** A warning icon and text stating "Detailed Plan available here: End Game Plan".
- Jazz Development Description:** A text box explaining the development process: "Umbrella area for all Jazz development work... Development work is done in a separate development line named 'development'... Each release is performed in its own project phase." It also mentions the role of the PMC and team members.
- Open Track Build Items (1):** A list showing "11841 RC1 status".
- Current Development Plans (33):** A table with progress bars for various components:

CQ Connector	Progress bar
Component Development	No planned work
Foundation & Work Items	Progress bar
Install	No planned work
PMC	No planned work
Process	Progress bar
Release Engineering	Progress bar
Repository	Progress bar
SCM	Progress bar
UI Design	Progress bar
User Assistance	Progress bar
Web Dashboards	Progress bar
Web UI	No estimated work
- Risks (10):** A list of risk items such as "48863 [Risk] Migrating/importing SVN repositories", "48865 [Risk] Migrating from an existing bug tracking system", etc.
- RFS (28):** A list of Risk-Free Status items such as "9619 [RFS] Monitoring a continuous build", "9629 [RFS] Create iteration plan, assign work, track progress", etc.
- Jazz Development Event Log (2 new):** A log of recent events, including "Test scenario: Process author creates/refines a Process Template (51513) Now" and "Test scenario: Customer hears about Jazz and installs it (51462) 15 minutes ago".

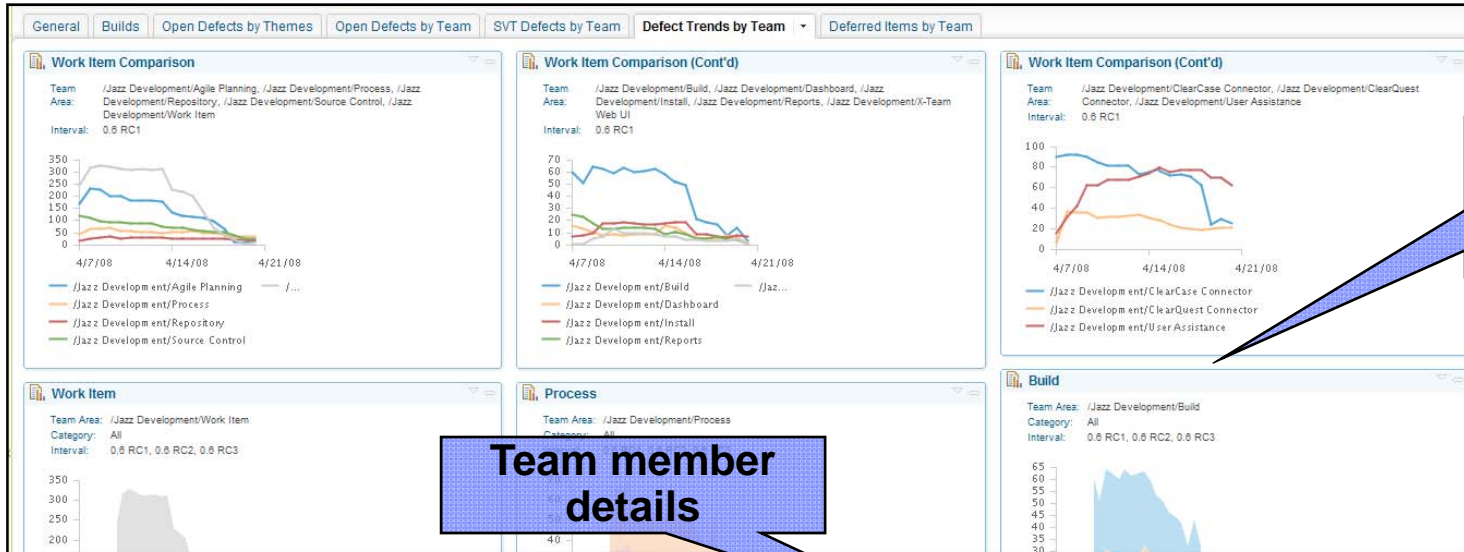

Clearly understand team goals

Risks, issues, challenges surfaced at both the team and project level

Real-time status

Dashboards and reporting

Trending by project or by individual team

Team member details

Current milestone status

This section shows the 'Current milestone status' and 'Work Item Members' details:

- Current Work Item Plans (2):** Shows the current iteration as 0.6 RC1 and includes progress bars for 'Foundation & Work Items'.
- Work Item Event Log (15 new):** Lists recent events such as 'WebUI - Hide comment is confusing - lost work (51725) 10 minutes ago' and 'Indexing slow on attachment with long lines (48806) 15 minutes ago'.
- Work Item Members (16):** A list of team members and their roles:

André Weinand	componentlead, contributor, integrationstreamadmin, integrationbuildmeister
Benjamin Pasero	contributor
Christof Marti	contributor, integrationbuildmeister
Dirk Baeumer	parttime, contributor, integrationstreamadmin, integrationbuildmeister
Erich Gamma	contributor, newcomer, integrationstreamadmin, integrationbuildmeister, dashboardadmin, projectadmin, PMC
Frank Lyner	contributor
Johannes Rieken	parttime, contributor, integrationbuildmeister
Larry Smith	contributor, integrationbuildmeister
Marcel Bihl	contributor
Mark Buquor	newcomer, parttime
- Work Item Builds:** Shows a recent successful build: 'Succeeded: continuous.workitem.jazz.C20080424-0748 10 minutes ago'.

Agile Processes Included with Rational Team Concert

■ Agile process template

- ▶ The Agile process template provides a mash-up of best practices of several existing agile processes. Incorporates "XP" style agile methods.

■ The Eclipse Way process template

- ▶ The Eclipse Way process is an agile, iteration-based process with a focus on consistent, on-time delivery of quality software.

■ OpenUp process template

- ▶ The OpenUp process preserves the essential characteristics of the Rational Unified Process®, which includes iterative development, use cases and scenarios driving development, risk management, and an architecture-centric approach.

■ Cloudburst Sample process template

- ▶ The Cloudburst Sample Process template is designed to support the Cloudburst reference project, which is available with theJazz technology platform.

■ Scrum process template

- ▶ The Scrum process template supports a popular approach to managing projects in an agile way.

■ Simple Team process template

- ▶ The Simple Team process template enables teams to get started quickly. Team members have permissions to perform any modification in the project.

The Rational Team Concert family 2009

Express-C

Community and Academia

- In-context collaboration
- Open source middleware
- Up to 10 users per server

Express

Mid-sized and Departmental

- Project dashboard
- Out-of-the-box processes
- Commercial middleware
- Up to 50 developers per server

Standard

Corporate Teams

- Customizable process
- Real-time project health
- LDAP admin
- Enterprise scale and extensibility

Agenda

- Background
- Jazz, Team Concert and the Rational Jazz offerings
- A closer look at Jazz and Team Concert
- **Using Jazz with the Rational Software Development Platform**
- Using Jazz with other products - extensions and integrations
- Jazz in use today

Leveraging Rational Team Concert independently

✓ Rational Team Concert Standard, Express, Express-C

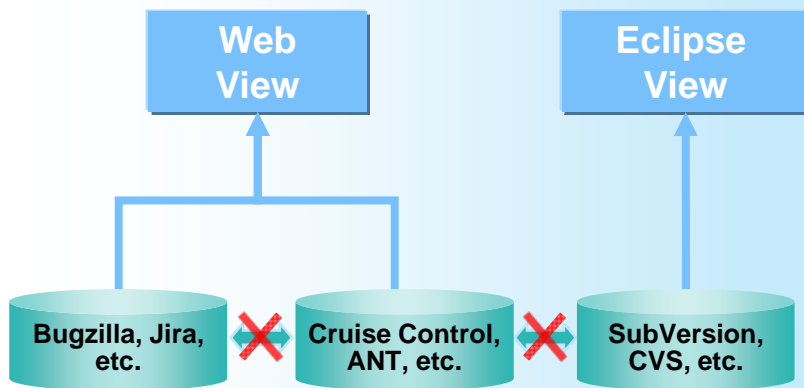

- ✓ A standalone development environment optimized for small and mid-sized teams
- ✓ All the collaborative capabilities of the Jazz platform – plus integrated work items, SCM and build management
- ✓ Dashboards and real-time reports
- ✓ Team and Process-aware

Open Source vs Rational Team Concert

Cut administration costs and increase productivity with Rational Team Concert

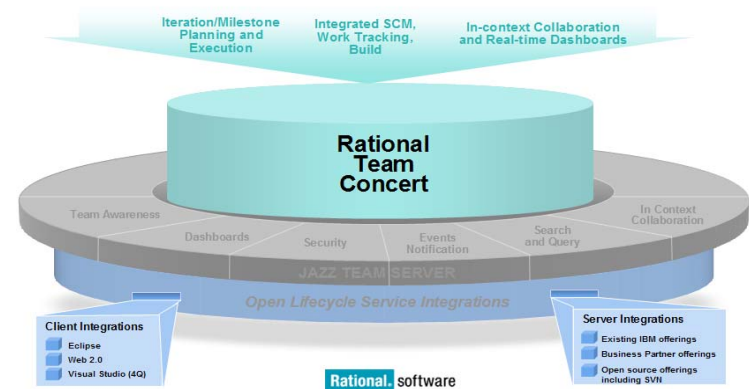

Open Source

Point Products for individual productivity

- Significant costs to maintain and administer federated databases
- No concept of project, teams or schedules
- No single, consolidated view into project status and health
- SCM, work items, build functionality unaware of each other providing little to no insight into relationships between artifacts

Increased productivity with Rational Team Concert

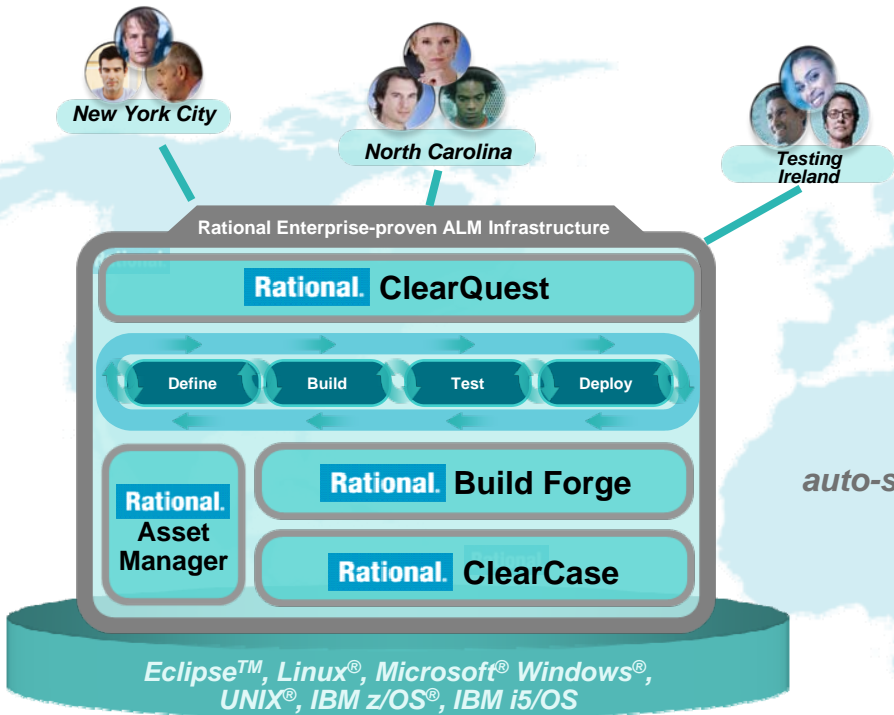

Fully integrated collaborative application lifecycle management solution

- ✓ Designed for agile and distributed teams
- ✓ Fully aware of projects, team process, team composition, who's doing what and by when, in-context collaboration with instant messaging discussions, discussion threads kept with work items
- ✓ All-in-one solution for the core development team with planning, SCM, work items, workflow, build management, dashboards and reporting fully integrated
- ✓ Single download package, easy to install and get started, minimal administration, easy startup of projects, onboarding and offboarding of team members quickly

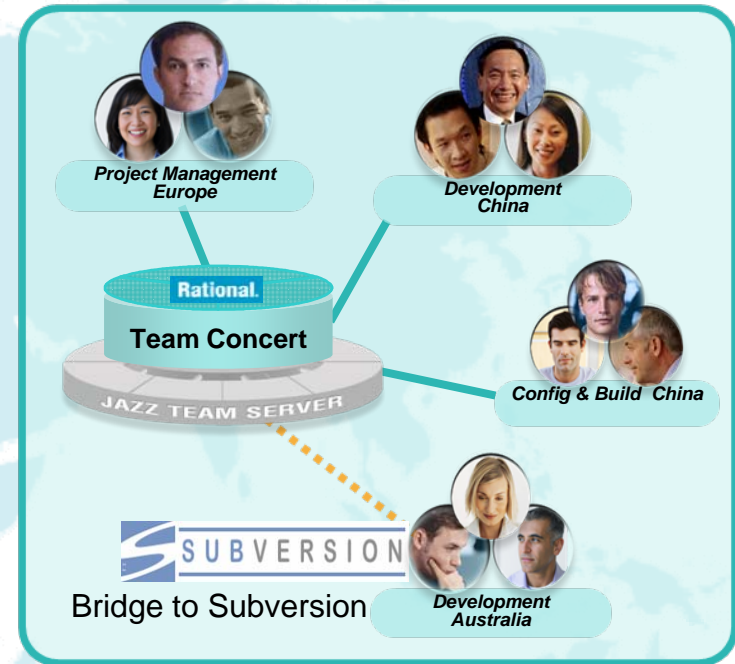

Unify distributed teams in mid-sized or enterprise settings

Bi-directional auto-synchronization

A complete, solution for departmental and medium-sized distributed teams

- Enables teams to reuse enterprise assets, process and investment in ClearCase/ClearQuest
- Take advantage of new collaborative ALM in an evolutionary way with lower business risk
- Manage status/priorities in ClearQuest and develop with the right ALM solution for your project.
- Use the “right-sized” governance solution for different projects needs.
- Developers can deliver work from “satellite” teams directly into enterprise ClearCase projects

The ClearCase/ClearQuest customer view:

CIO

*“How do I transform my business to **Collaborative ALM** while **reusing enterprise assets in ClearCase/ClearQuest** and minimizing disruption and risk?”*

Project Lead

*“We do all of our reporting and work assignment in **ClearQuest** and we want to **maintain a consistent reporting process** for all our development projects”*

Developer

*“I’m on a small team, developing web 2.0 UI applications **using agile methods**. But I need to deliver to a much larger **ClearCase-based** project”*

SCM Lead Architect

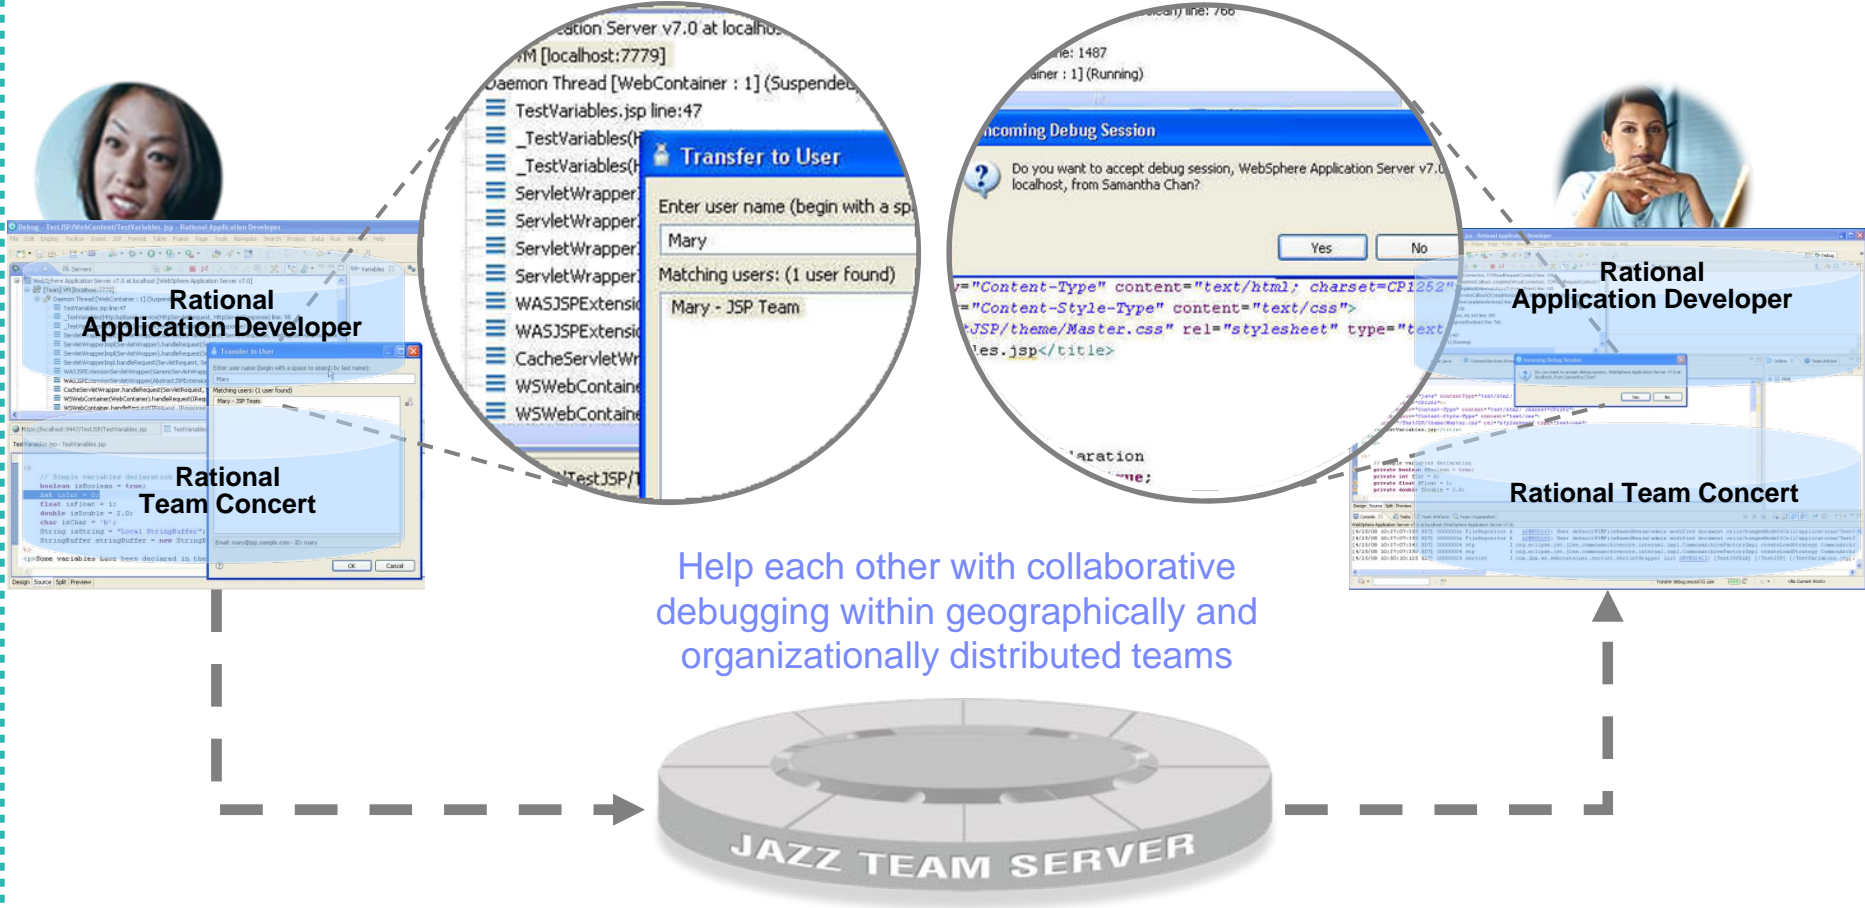

*“Our **ClearCase process works great** but some small teams have deployed many different variants of Subversion and there is no common process or method to report status. We are losing control and consistency. **HELP!**”*

Collaborative debugging

Using Rational Team Concert and Rational Application Developer

Share live debug sessions between team members

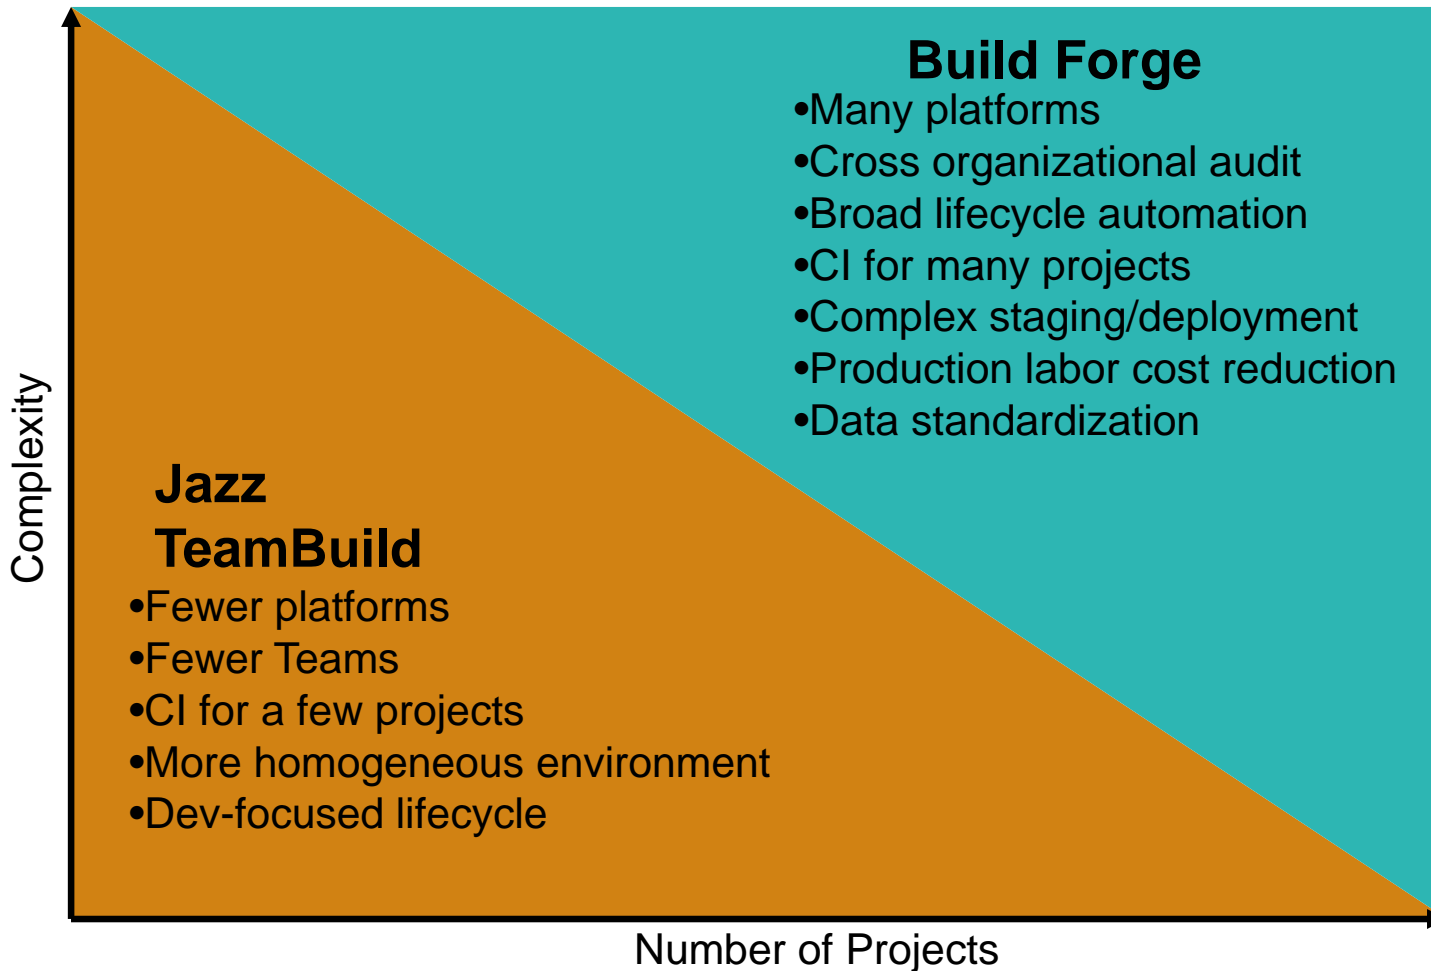

Help each other with collaborative debugging within geographically and organizationally distributed teams

Rational Software Build Solutions

When to use each

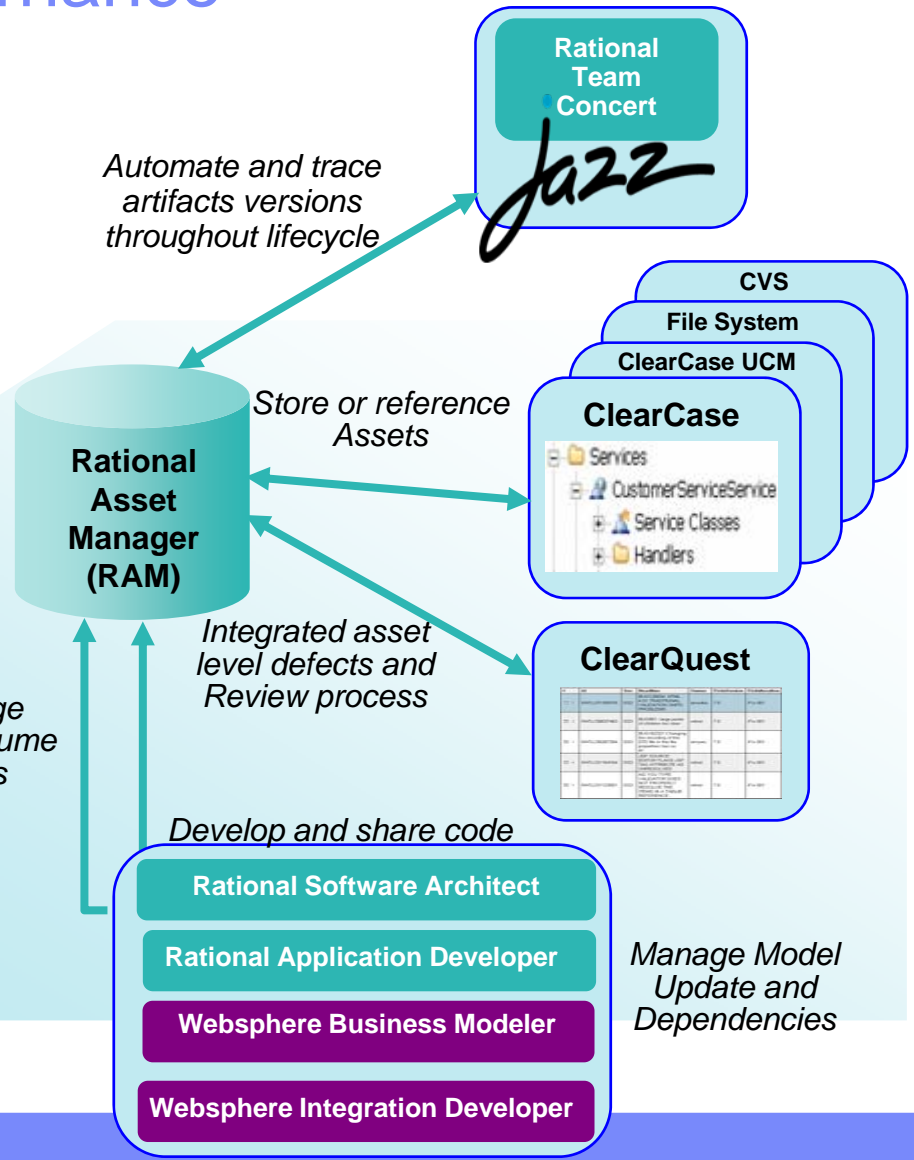

Leverage existing and new investments to facilitate asset collaboration and governance

- **Understand and leverage the artifacts used to develop and build an asset**
 - Identify an asset's versioned artifacts quickly
- **Quickly submit change requests for an asset**
 - Track and fix problems quickly - all in the same IDE!
- **Increase Productivity**
 - Develop code in a team environment
 - Integrate with a customer's existing environment
 - Search, create, reuse and communicate created assets

- A closer look at Jazz and Team Concert
- Using Jazz with the Rational Software Development Platform
- **Using Jazz with other products - extensions and integrations**
- Jazz in use today

3rd party Jazz offerings

Extend the Jazz platform with powerful, integrated offerings from IBM Rational ISV's

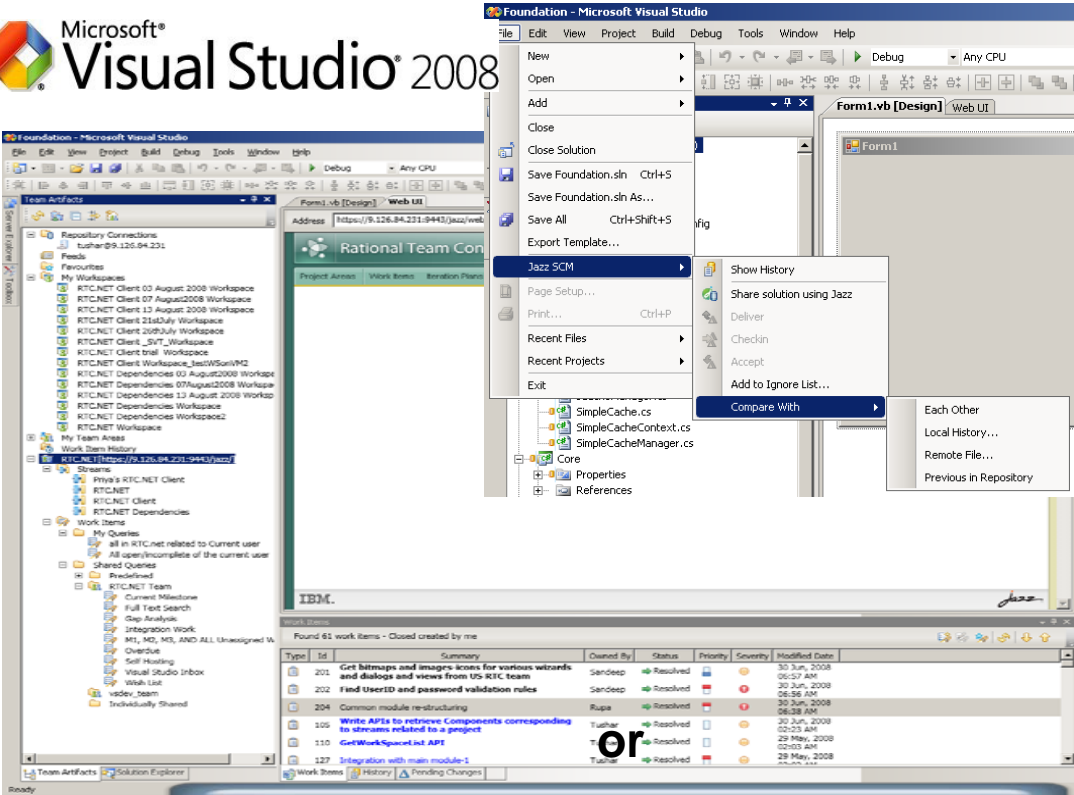

Ready for
IBM | Rational.
software

Extend team collaboration to Visual Studio developers

Rational Team Concert client for Microsoft Visual Studio IDE

- Enables you to work within your Microsoft Environment for maximum efficiency
- Manage SCM, Build, & work items from within Visual Studio
- Collaborate across teams
- Central repository across environments
- Included with Rational Team Concert

Mainsoft Document Collaboration for Rational Jazz

Microsoft SharePoint, Lotus Quickr Integrations

Collaboration in context

Extend development teams' collaboration toolkit with direct, per-project document linkages

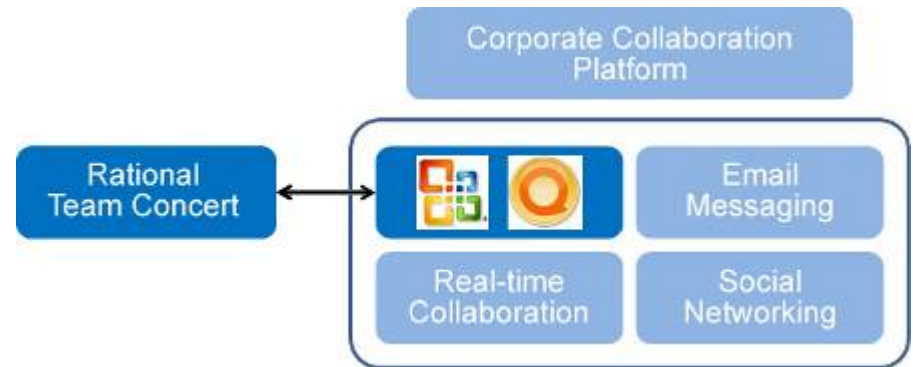

End-to-end governance

Improve the transparency of software deliveries as well as automate and enforce project governance

Business stakeholders can participate in software deliveries

Using their preferred collaboration tools – either Microsoft or Lotus

Connect Rational Team Concert with Microsoft SharePoint or Lotus Quickr

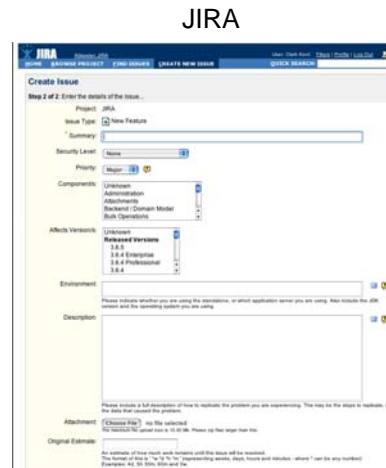

JIRA2RTC Connector for RTC

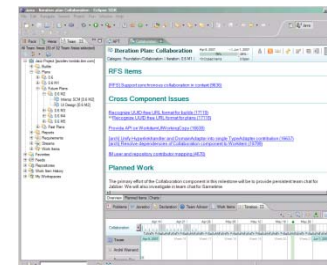

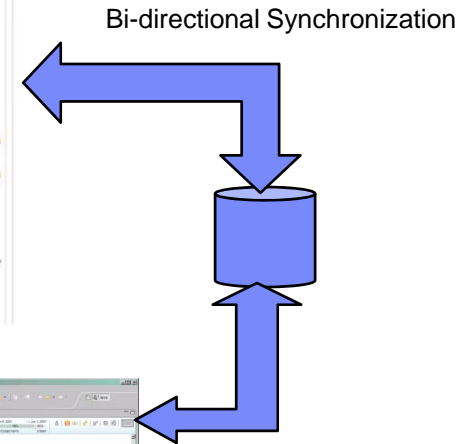

- Developed by CM-Logic Ltd
 - IBM Rational Business Partner

- Connector provides these features:
 - Create records in either RTC or JIRA
 - Update records in either RTC or JIRA
 - Export all records from JIRA and import into RTC
 - Bi-directional synchronization

- Brings RTC to the JIRA community

JIRA

Rational Team Concert v1.0

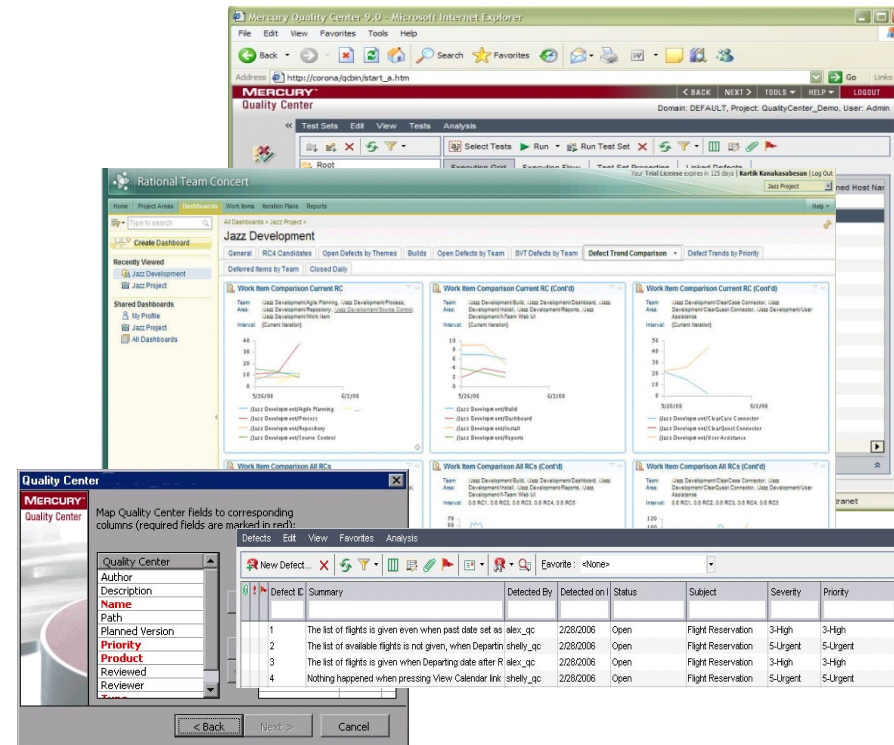

BSD GROUP RTC Adapter for HP Quality Center

IBM Rational Team Concert provides a collaborative, role-based, business-driven project management solution.

How do you bring your test team's Quality Center assets into the fold?

- **The Need:**
 - ▶ Bi-directional integration of IBM Rational Team Concert and HP Mercury Quality Center
 - ▶ Synchronize QC defect records and workflows with RTC
- **The Solution:**
 - ▶ **BSD Rational Team Concert Adaptor for Quality Center** in conjunction with IBM Rational Team Concert

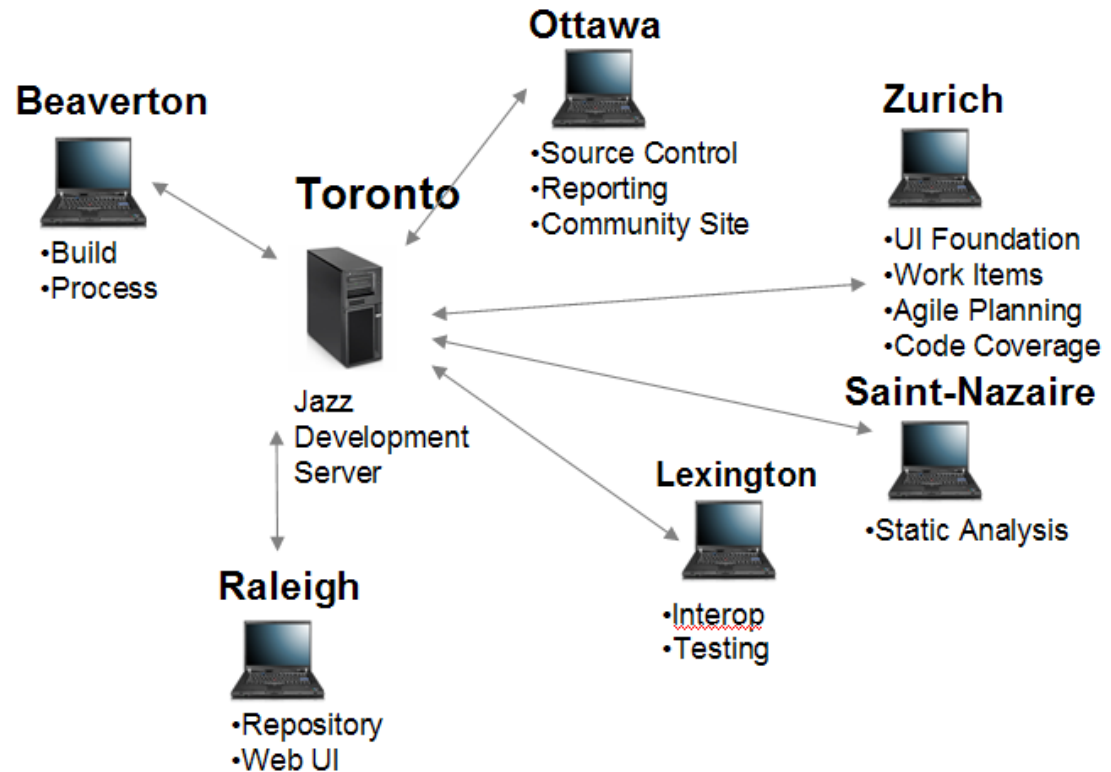

Agenda

- Background

- A closer look at Jazz and Team Concert
- Using Jazz with the Rational Software Development Platform
- Using Jazz with other products - extensions and integrations
- **Jazz in use today**

How we use Rational Team Concert at IBM

- 2-way Xeon Server running application server (WAS) and another running DB2
- Jazz Project – Using bi-weekly iteration builds
 - Jazz and Rational Team Concert self hosting since 4Q06
 - Global team in 7 locations in NA Europe and India
 - ~100 developers, plus jazz.net webclient access
 - Repo > 10G, 66K files, 43K work items
- Over 10 internal Rational development teams leveraging Rational Team Concert
- 25+ Other Rational teams using Rational Team Concert

800 Business Partners worldwide “jazzed” about Rational

Customer feedback

"By helping us to make project deliveries more repeatable and predictable, we anticipate that Rational Team Concert will *reduce project overrun costs by 20%*."
 --Matt Pomroy - Executive, Software Engineering, Ascendant Technology

"Its automated project management dashboards are transparent to everyone – not just managers. This immediate and *automated feedback helps keeps teams on track and motivated to achieve project goals.*"
 --Han Jie - Senior Consultant, Siemens

"Where we previously used separate systems, with Rational Team Concert we now have well integrated functionality. *Our developers are more efficient because they are better able to focus on important issues. Our project managers greatly value the ability to customize these dashboards and instantly provide status on their milestones!*"
 --Mika Koivuluoma - Production Manager, TietoEnator

"Having a *unified and extensible environment is very compelling for us. Rational Team Concert provides the team transparency and visibility needed to keep work progressing so everyone knows what's going on without finger-pointing.*"
 --Carson Holmes - Unified ALM Services Manager, Noblestar

"With IBM Rational Team Concert we've seen a *30% productivity gain on our global projects. The ability to easily suspend and resume work, along with advanced SCM features, helps team members juggle multiple tasks and priorities without missing a beat.*"
 --Alain Bergeron - VP Consulting Services, CGI
