# How Flex Works

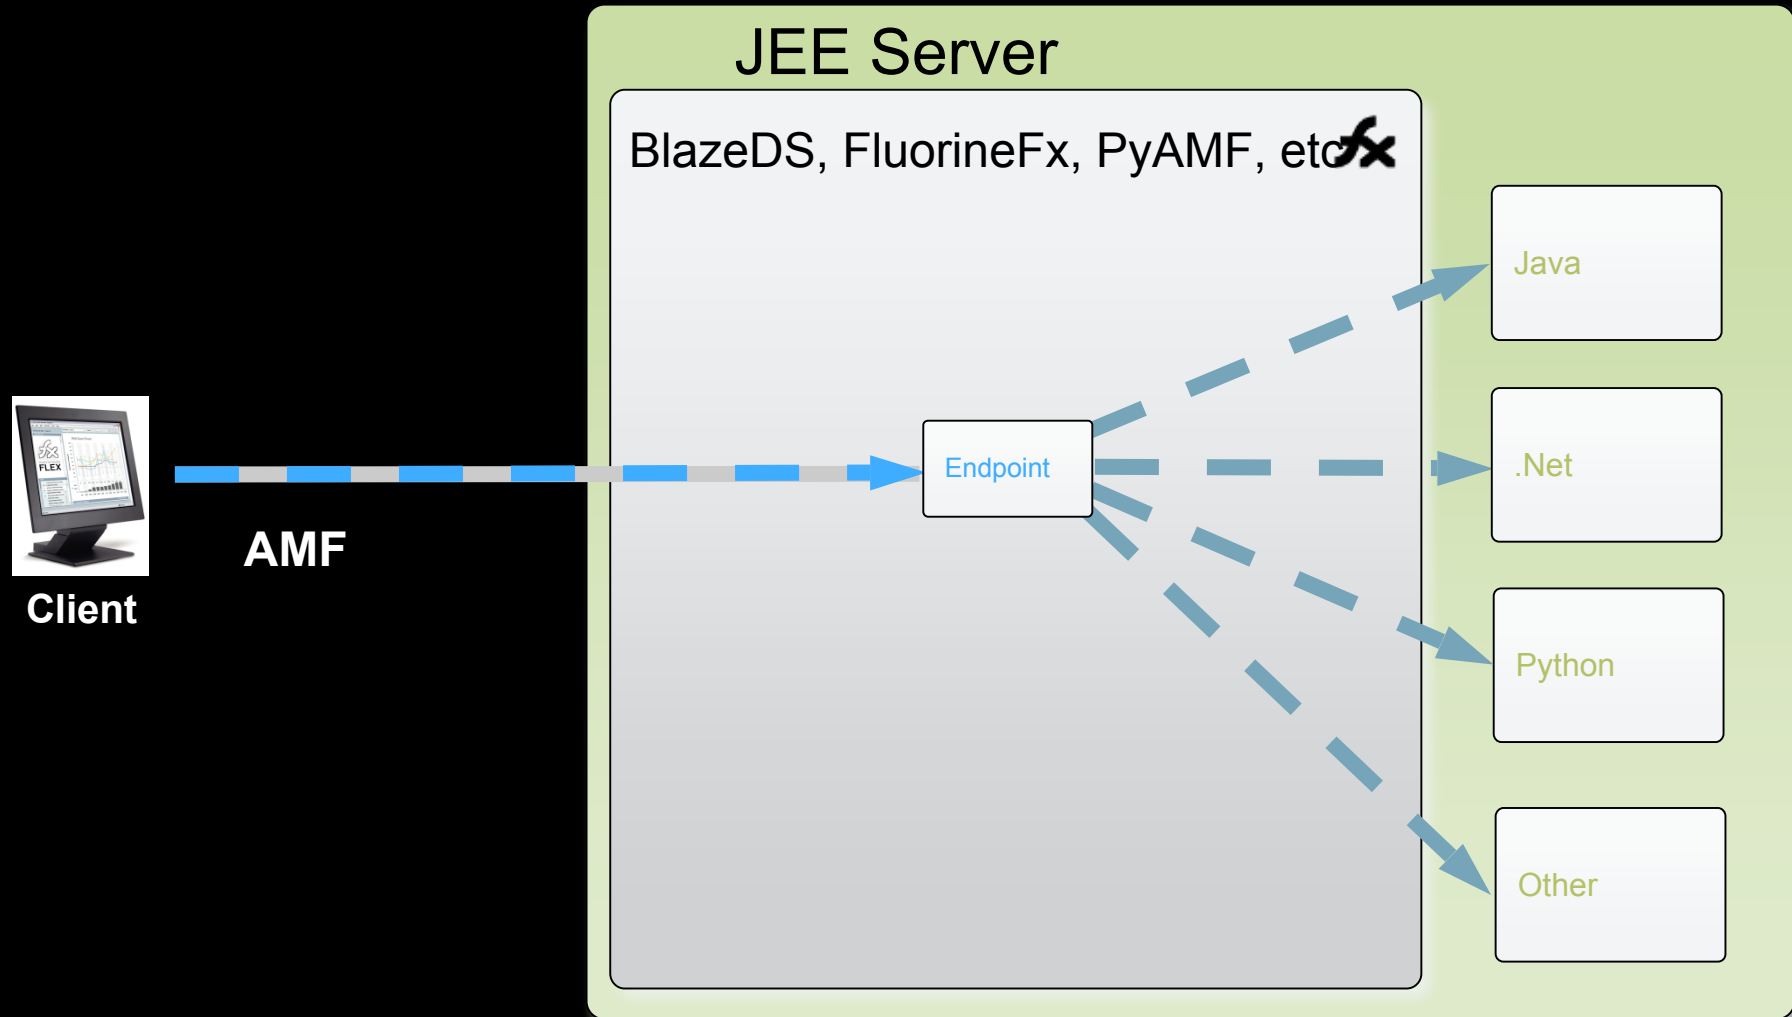

# Tour de Flex - flex.org/tour

The screenshot displays the Adobe Tour de Flex website for the 'Button' component. The interface is divided into several sections:

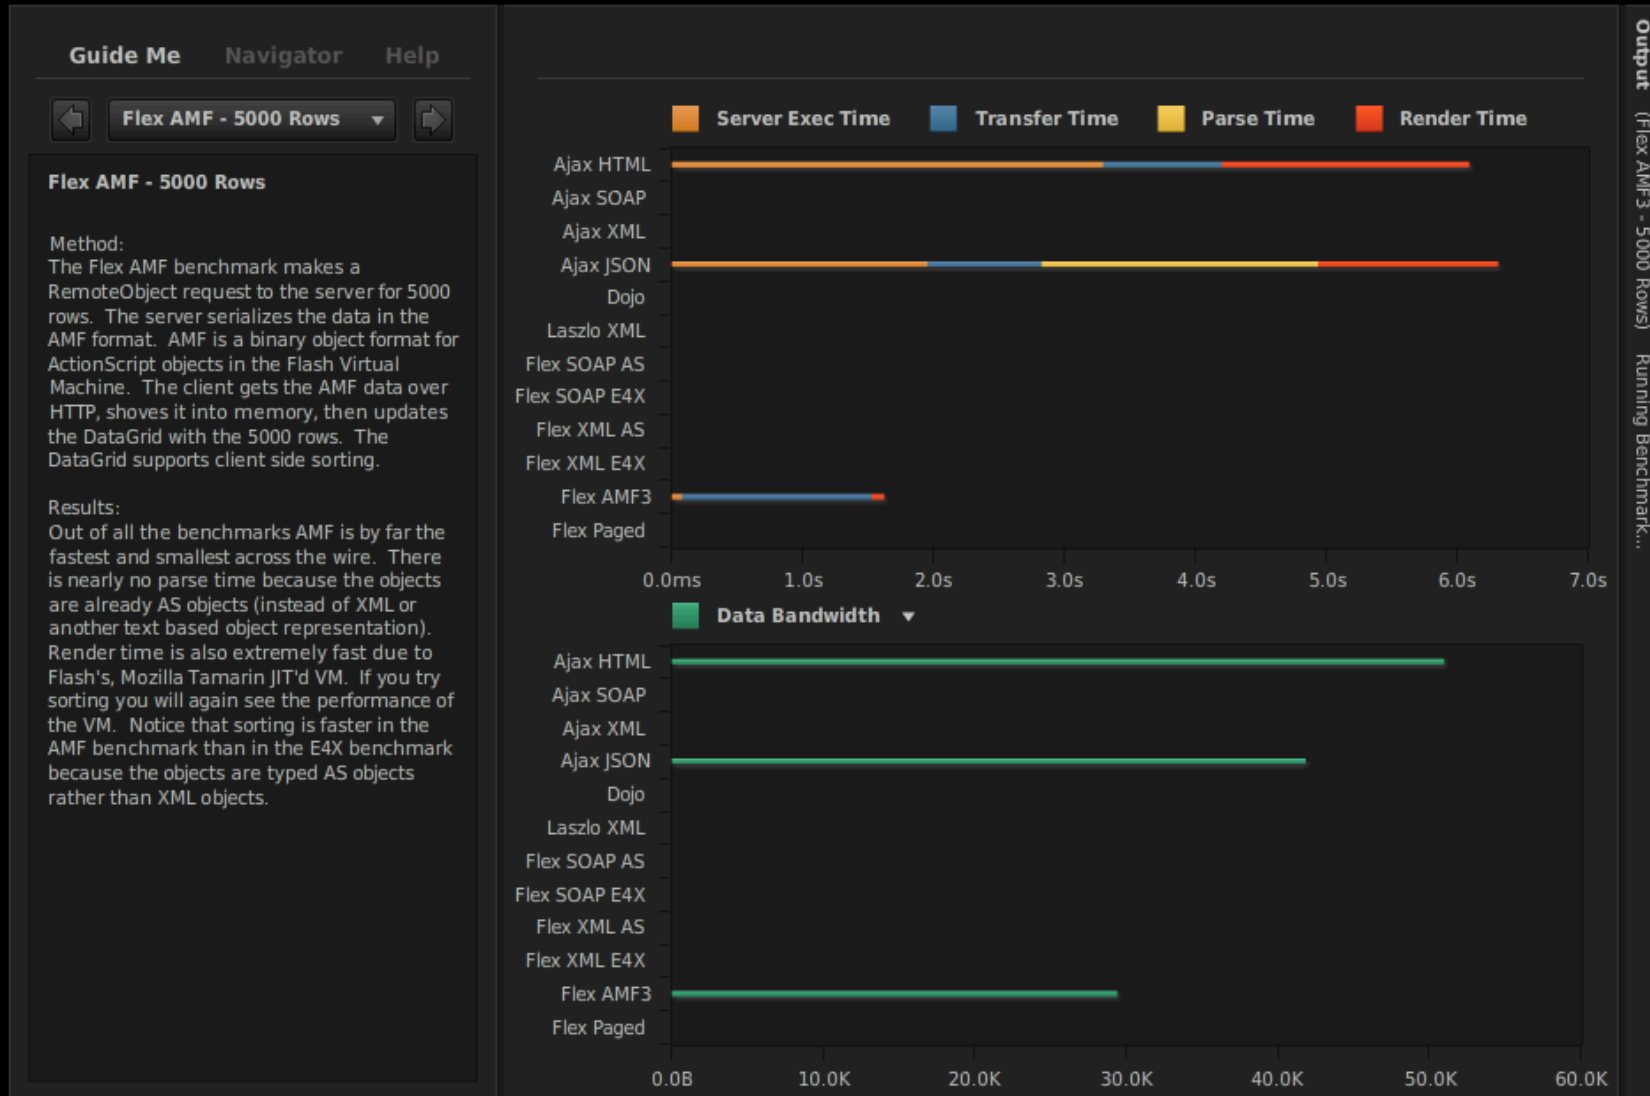

- Navigation Menu (Left):** Lists various Flex Core Components such as UI Controls, Data Entry Controls, Buttons, Containers, Effects, Formatters, Validators, Charting, and Coding Techniques.
- Component Overview (Bottom Left):** A text block stating: "The Button control is a commonly used rectangular button. Button controls look like they can be pressed. They can have a text label, an icon, or both on their face. Author: Adobe Systems, Inc. Date Added: 2008-10-01".
- Preview Area (Center):** Titled 'Button', it shows a 'Sample 1' window with a 'Button Control Example' containing four buttons: 'Default Button', 'Button With Icon', 'Skinned Button', and 'CUSTOM BUTTON'.
- Code Editor (Bottom Right):** Shows the MXML and ActionScript code for the buttons. The code includes:

```
<?xml version="1.0" encoding="utf-8"?>
<mx:Application xmlns:mx="http://www.adobe.com/2006/mxml" layout="horizontal" viewSourceURL="
verticalAlign="middle" horizontalAlign="center" backgroundGradientColors="{0x02000,0x3
<mx:Script>
<![CDATA[
    <script mx:controls.Alert;
    ]]]>
</mx:Script>
<mx:Panel title="Button Control Example" layout="vertical" height="100" color="0xffffff"
paddingTop="10" paddingRight="10" paddingBottom="10" paddingLeft="10" horizontalAlign
<mx:Box horizontalGap="10" verticalAlign="middle">
<!-- normal button -->
<mx:Button id="defaultButton" color="0x323232" label="Default Button" click="{Al
<mx:Button id="iconButton" label="Button With Icon" labelPlacement="right" paddi
</mx:Box>
</mx:Panel>
</mx:Application>
```
- Footer (Bottom):** Copyright information: "©2008 Adobe Inc. All Rights Reserved. Version: 1.0 RC1. List Version: 2008-11-10-2. Samples: 218".
