#### 'Mortgage Rate Time-Bomb'

Could it be about to explode?

UK Interest Rate Forecast 2010 - 2011

The base rate stands at a historic low of 0.5% for the 15th consecutive month, but amid political uncertainty and inflation well above target, experts are expecting the Bank of England to raise rates soon. With rates still available from 1.99% should you get a low-rate mortgage now?

The image shows a horizontal bar chart. The x-axis is labeled with '0' at the left end and '230' at the right end. A dark grey bar starts at the '0' mark and extends to the right. At the very beginning of this bar, there is a black arrowhead pointing to the right, containing the white number '50'. The rest of the bar is a uniform dark grey color.

The grooviness of  
our holy grail.

Automation is worth  
the investment.

Keeping the costs down.

**We have an asset.**

Tests are now our  
maintenance nightmare.

The safety net of tests  
is a double edged sword.

Getting better again?

0

230

230

Just getting stuff out of the door  
isn't enough to keep a team healthy.

A vision is not just for Christmas.

New measures of success.

Unconscious culture is a risk

Learning to deliver the right thing,  
in the right way,  
is more than just adapting to change.

Thanks for listening!
